Subject: Sole Source Justification for Repair Services for Ambulances, Large Fire Apparatus, and ARFF Apparatus

This letter serves as formal documentation that Seaside Diesel is the sole source provider for repair services that require lifting for our ambulance fleet, fire engines, fire trucks, and ARFF apparatus in Juneau, Alaska.

While conducting a review of local service providers, we also reached out to Affordable Auto, Capital Service, and Seal Pup for price quotes. However, during our inquiry, it was confirmed that none of these facilities has ceiling heights sufficient to accommodate a large apparatus on a vehicle lift. This structural limitation prevents them from performing full-service repairs.

Seaside Diesel is the only repair facility in town with a service bay tall enough to lift our large apparatus, making it uniquely capable of performing the required work. This feature is essential for maintaining safety standards and ensuring proper access to the vehicle's transmission and engine systems. Etc..

As a result, Seaside Diesel is the only vendor in the area qualified and equipped to provide this service. We are therefore designating them as a sole source supplier for repairs on large apparatus that require lifting, unless another service provider becomes available locally.

MR 26-118 Sole Source for ARFF Apparatus Repairs
