Here is this updated request, please let me know if you think it could use more detail:

Marine Park Wireless Internet Service - \$50,000

Project Description

The demand for wireless internet service increases significantly each year during the summer months at the Downtown Public Library. The Library's internet service regularly handles over 100 simultaneous connections with every seat in the library occupied, leaving the library marginally accessible for other uses and users during the summer. This project would allow the Library to purchase networking equipment and build out the infrastructure necessary to provide wireless internet access to users in Marine Park from May 1st through the end of the tourist season each year. Annual costs after the first initial year would be limited to maintenance and internet service provider fees.

The anticipated reach of this service is from the Marine Park pavilion, to and around the Marine Parking Garage, and along the docks to 16B. Expanding reach in the future, if desired, will be possible.
