 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 2 Moderate** - Operational Period 19 (8/6/2020 - 8/20/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 Moderate	Outbreaks are ongoing but controlled. Community spread based cases are occurring at low rates.	Hospital capacity is good and the general situation at the hospital is stable.	The testing environment is stabilizing. Contact tracing is constrained statewide, but local investigations are being conducted in a timely manner.

Complete CBJ COVID-19 Dashboard and be found [here](#) or by going to Juneau.org/COVID-19

Situation Assessment: We continue to experience a steady uptick in cases and while our new 7 and 14 day case rate indicators have elevated into the high category, we maintain a moderate risk assessment due to the contained nature of the outbreaks.

Family-gathering type events continue to be a major source of transmission in the community and the community is urged to keep their social bubble small.

Cases associated with travel and community spread continue as well but at lower numbers.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	34	114	1	149
Non Resident	15	76	0	91
Total	49	190	1	240

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Issues of Note:

Airport operations continue to work through technology and communication issues. Overall passenger numbers are down slightly. We are no longer able to report out on the % of resident vs. nonresident passengers due to changes in the technology system. See charts at end of this report for more detail.

Disease Transmission/Contact Tracing:

There are 0 new cases reported for Juneau today.

The State of Alaska is reporting 68 new cases today bringing the statewide cumulative case count to 5,177.

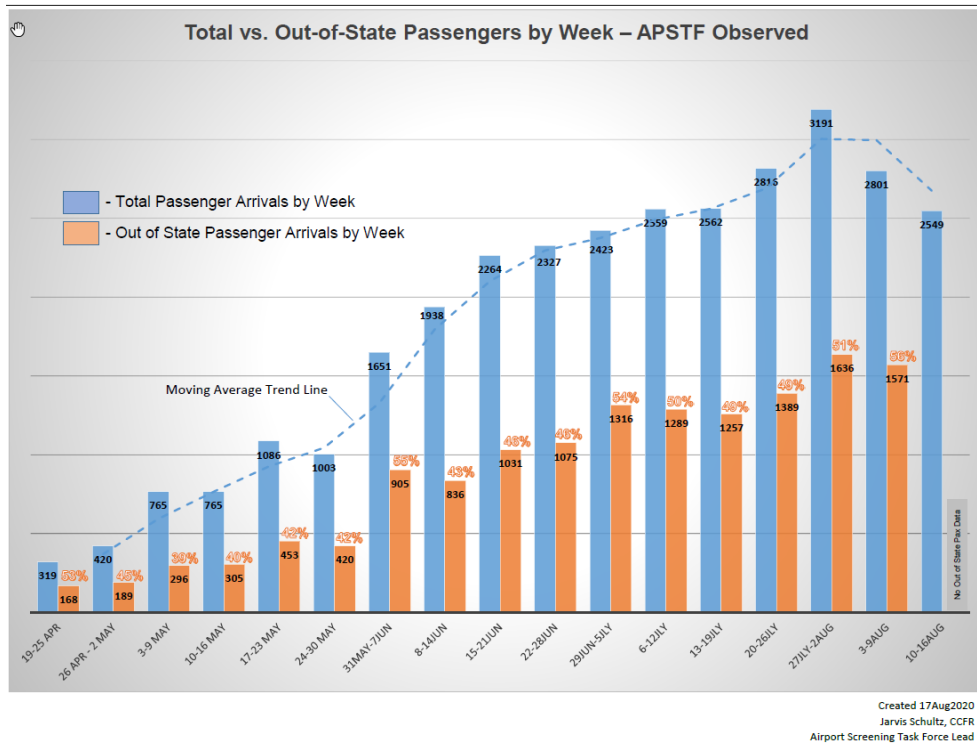

Testing:

0 tests were returned on Monday due to the State Lab being closed on Sundays.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and is generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website

Alaskan information is for residents only. We are working on a chart that combines resident and nonresident case averages.
