DATE:  August 23, 2020  
TO:  CBJ Assembly  
FROM:  Mila Cosgrove, Incident Commander  

Complete CBJ COVID-19 Dashboard and be found [here](#) or by going to Juneau.org/COVID-19

**Situation Assessment:**  We continue to experience a steady number of new cases.  Although our 14 day case rate indicator remains in the high category, the 7 day indicator has dropped back to moderate as the cases associated with several of our outbreaks begin to fall outside of the designated time frames.

Family-gathering type events continue to be a source of transmission in the community and the community is urged to keep their social bubble small.

Juneau reported 6 new cases today.  DPH does not provide updated data over the weekend.

<table>
<thead>
<tr>
<th>Overall Community Risk</th>
<th>Disease Situation</th>
<th>Hospital Capacity</th>
<th>Public Health Capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Level 2 Moderate</strong></td>
<td>Outbreaks are ongoing but controlled. Community spread based cases are occurring at low rates.</td>
<td>Hospital capacity is good and the general situation at the hospital is stable.</td>
<td>The testing environment is stabilizing. Contact tracing is constrained statewide, but local investigations are being conducted in a timely manner.</td>
</tr>
</tbody>
</table>
Issues of Note:

Disease Transmission/Contact Tracing:
There are 6 new cases reported for Juneau today. CBJ is still leading the state numbers in reported nonresident cases. In addition, our recovered numbers continue to be larger than what is being reported by the state due to more timely local reporting.

The State of Alaska is reporting 66 new cases today bringing the statewide cumulative case count to 5,558.

Testing:
149 test results were received yesterday. Date ranges were not submitted.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (https://globalepidemics.org/key-metrics-for-covid-suppression/) and is generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.

Beginning 8/20/2020, Alaskan data includes resident and non resident cases.
