 RE: **Situational Update –Level 2 Moderate** - Operational Period 20 (8/20/2020 - 9/3/2020)

| Overall Community Risk  | Disease Situation  | Hospital Capacity  | Public Health Capacity   |
|-------------------------|--|--|--|
| <b>Level 2 Moderate</b> | Outbreaks are ongoing but controlled. Community spread based cases are occurring at low rates. | Hospital capacity is good and the general situation at the hospital is stable. | The testing environment is stabilizing. Local investigations are being conducted in a timely manner. |

**The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/COVID-19](#)**

**Situation Assessment:** We continue to experience a steady number of new cases. Our 14 day case rate indicator has reduced to the moderate level and the 7 day indicator is moving between minimal and moderate as the cases associated with several of our outbreaks begin to fall outside of the designated time frames.

**Issues of Note:**

There is a Community Update session scheduled for Tuesday, September 1<sup>st</sup> at 5:00 pm. In addition to the update on COVID numbers in the community, Sarah Hargrave will be on with us to talk about contact tracing.

We do not receive updated numbers from DPH on the Weekends.

| COVID-19 In Juneau |           |            |          |            |
|--------------------|-----------|------------|----------|------------|
|                    | Active    | Recovered  | Deceased | Cumulative |
| Resident           | 15        | 155        | 1        | 171        |
| Non Resident       | 2         | 94         | 0        | 96         |
| <b>Total</b>       | <b>17</b> | <b>249</b> | <b>1</b> | <b>267</b> |

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

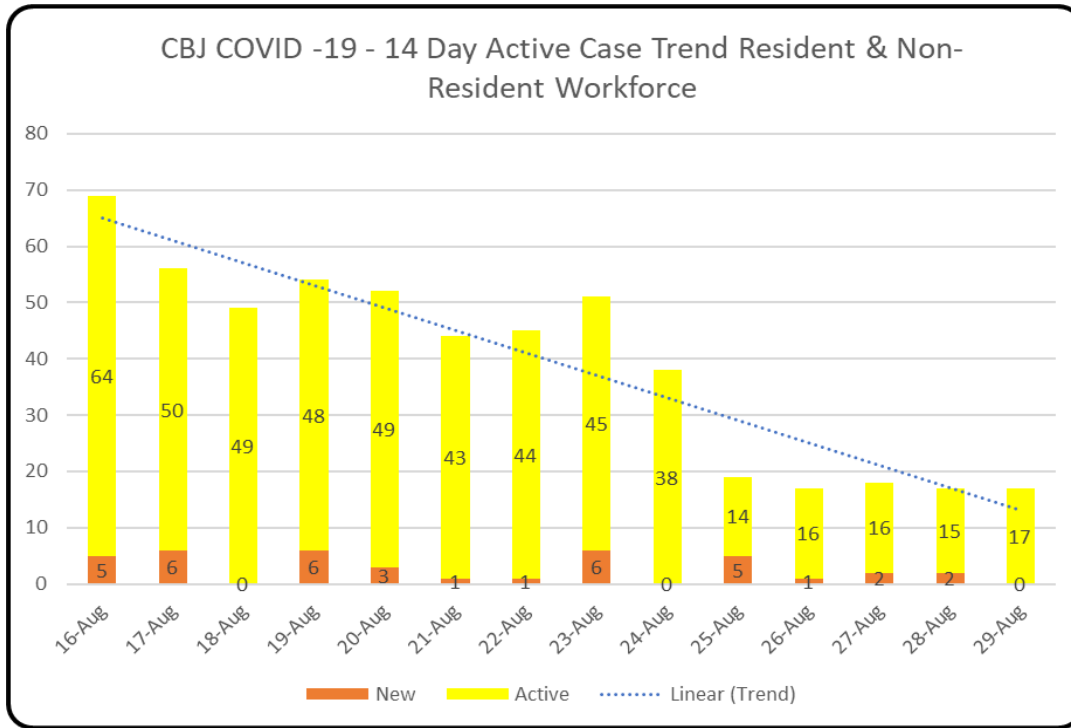

**Disease Transmission/Contact Tracing:**

There are no new cases reported for Juneau today. CBJ continues to show a higher number of nonresident cases than what is reported on the state dashboard. In addition, our recovered numbers continue to be larger than what is being reported by the state. Both discrepancies are due to more timely local reporting.

The State of Alaska is reporting 95 new cases today bringing the statewide cumulative case count to 6,035.

Testing:

No testing data is available today.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website

Beginning 8/20/2020, Alaskan data includes resident and non resident cases.
