FROM: Mila Cosgrove, Incident Commander

RE: Situational Update – Level 2 Moderate - Operational Period 23 (10/1/2020 – 10/15/2020)

Situation Assessment: Our overall number of positive cases have dropped off compared to previous weeks. Our 14 day case rate indicator remains at the moderate level and our 7 day case rate indicator has reduced to the minimal level. There is still community spread happening in the community and, as a result, people are urged to take appropriate cautions and in particular to refrain from indoor, unmasked activities with individuals outside of family/social bubbles.

Issues of Note: None reported.

Daily Numbers Report:
We are reporting no new cases today. Division of Public Health does not report numbers over the weekend and the state dashboard numbers for Juneau are still lagging our more up to date numbers.

</tbody>
</table>

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:
The state dashboard is showing a lower number of resident cases and nonresident cases than what is reported on the CBJ dashboard. In addition, our recovered numbers continue to be larger than what is being reported by the state. This is due to the timing of reporting. CBJ numbers are more accurate.
The State of Alaska is reporting 143 new cases today bringing the statewide cumulative case count to 9,376.

**Testing:**
We did not receive test data today.

---

**CBJ COVID-19 - 14 Day Active Case Trend Resident & Non-Resident Workforce**

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute ([https://globalepidemics.org/key-metrics-for-covid-suppression/](https://globalepidemics.org/key-metrics-for-covid-suppression/)) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
