 TO: CBJ Assembly
 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High-** Operational Period 27 (12/3/2020 – 12/31/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to Juneau.org/COVID-19
Level 3 - High	Community spread based cases continue to occur. The containment situation remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	

Situation Assessment: Our 14 day case rate is at the Very High alert level and our 7 day case rate is at the High alert level. The disease is moving across all disease acquisition types: secondary infection, travel and community. Contact tracing is improving, but remains constrained due to caseloads statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members.

Issues of Note:

Approximately 1,040 people have taken advantage of the asymptomatic testing at the Hagevig Fire Training Center through Friday close of business. To date, 784 of the submitted tests have been processed, with 14 returning COVID positive. Sunday, December 13th is the last day of asymptomatic testing.

Work continues on vaccination planning with the first doses arriving as early as next week.

Daily Numbers Report:

We are reporting no new cases today. We don't get updates from the local public health office over the weekend and the state dashboard is still behind in reporting data.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	61	800	5	866
Non Resident	1	112	0	113
Total	62	912	5	979

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

The State of Alaska is reporting 533 new cases today bringing the statewide cumulative case count to 40,497.

Testing: Test results for the weekend will be reported on Monday, December 14th.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
