DATE: December 26, 2020
 TO: CBJ Assembly
 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High-** Operational Period 27 (12/3/2020 – 12/31/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to juneau.org/COVID-19
Level 3 - High	Community spread based cases continue to occur. The containment situation remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	

Situation Assessment: Our 14 day and 7 day case rate indicators are at the High alert level. The disease is moving across all disease acquisition types: secondary infection, travel and community. Travel related cases are climbing. Residents must take appropriate cautions, including limiting social bubbles to immediate family members. The public should strictly adhere to all health orders related to travel.

Issues of Note:

There are no significant issues of note to report today.

Daily Numbers Report:

Local Public Health is not reporting updated numbers over the weekend. The State dashboard numbers are still lagging local data.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	49	876	5	930
Non Resident	0	117	0	117
Total	49	993	5	1047

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

The State reported 203 new cases today for a total of 45,479 cumulative cases to date.

Testing: Testing data will be reported on Monday December 28th.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
