FROM: Mila Cosgrove, Incident Commander

RE: Situational Update – Level 3 High - Operational Period 28 (12/31/2020 – 1/28/2021)

Situation Assessment: Our 14 day and 7 day case rates have dropped to the High alert level. The disease is moving across all disease acquisition types: secondary infection, travel and community. Travel related cases remain elevated. Residents must take appropriate cautions, including limiting social bubbles to immediate family members. The public should strictly adhere to all health orders related to travel.

Issues of Note:
The State of Alaska did not update the COVID dashboard today due to the holiday.

Asymptomatic testing is under way at the Fire Training Center. Total tested so far is 328. 165 of those tests have been processed, with 2 tests returning positive. Testing will be available through Jan. 10th.

Daily Numbers Report:
We are reporting no new cases today.

Assembly EOC Update
CBJ COVID-19 Response

This table will be updated on January 2nd. No data was available today.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (https://globalepidemics.org/key-metrics-for-covid-suppression/) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
