RE: Situational Update – Level 2 Moderate - Operational Period 28 (12/31/2020 – 1/28/2021)

Situation Assessment: Our 14 day and 7 day case rate indicators are at the Moderate level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Weekly Summary – 14 day lookback for positive tests collected January 4th – January 17th.

Over the last rolling 14 day period, 41 people tested positive for COVID-19 in the community.

Highlights:

There was no reported case activity was associated with a cluster.

19.5% of the cases were designated as community spread, 34% of the cases were designated as Secondary Infection, 24.5% of the cases were associated with Travel, and the remaining 22% of the cases remain under investigation.

Contact tracing is improving with 90% of individuals being contacted within 24 hours of a positive test being returned.

Disease spread is across all age groups, most racial groupings, and is slightly more prevalent in males than females (54%/46%).

Disease Acquisition:

Of the 41 positive cases during the last 14 day period, 8 were identified as community spread, 14 were identified as secondary transmission, 10 were identified as travel related, and 9 remain under investigation.
Demographics:

Issues of Note:
Our first mass Point of Dispensing (POD) was a success. Operations went smoothly and overall, 1,182 doses were dispensed. The follow up clinic for the second does will be held February 5 – 7 at Centennial Hall.

There was a sharp increase in cases over the weekend – 22 cases in all from Friday at 1:00 to Tuesday at 1:00. Some of the cases are involved with a family grouping. There are 3 CBJ employees in this group, 2 of whom work in City Hall. COVID workplace mitigation efforts were in place, however out of an abundance of
caution, some employees who work on the first floor of City Hall are working at home for the remainder of the week. No member of the public came in contact with the positive employees.

**Daily Numbers Report:**
We are reporting 17 new cases today.

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

**Disease Transmission/Contact Tracing:**
We are reporting 15 new resident cases and 2 new nonresident cases today. Including the 5 cases over the weekend, 4 are community spread, 6 are secondary, 3 are travel (including the 2 nonresidents), and the remainder are under investigation.

The State is reporting 130 new cases today bringing the statewide cumulative total to 52,222 cases.

**Testing:**
01/15/21: 92 test results were received from the Fulgent Lab with collection dates between 01/12/2021 – 01/13/2021 – 56 tests returned in 2 days, and 36 tests returned in 3 days.

01/16/21: 165 test results were received from the Fulgent Lab with collection dates between 01/12/2021 – 01/15/2021 – 24 tests returned in 1 day, 64 tests returned in 2 days, 73 tests returned in 3 days, and 4 tests returned in 4 days.

01/17/21: 202 test results were received from the Fulgent Lab with collection dates between 01/14/2021 – 01/15/2021 – 156 tests returned in 2 days and 46 tests returned in 3 days.

01/18/21: 153 test results were received from the Fulgent Lab with collection dates between 01/13/2021 – 01/17/2021 - 31 tests returned in 1 day, 81 tests returned in 2 days, 38 tests returned in 3 days, 2 tests returned in 4 days, and 1 test returned in 5 days.

**Vaccine Need/Distribution in Juneau**
Vaccine counts are updated on Monday, Wednesday & Friday through the State Dashboard.
This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (https://globalepidemics.org/key-metrics-for-covid-suppression/) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
