 RE: **Situational Update –Level 1 Minimal-** Operational Period 30 (2/25/2021 – 3/25/21)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 1 - Minimal	Overall cases have dropped. Some community spread is present. Availability of the COVID vaccine is increasing.	The hospital case load is stable.	Contact tracing is stable.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

Situation Assessment: Our 14 day case rate indicator is at the moderate alert level and our 7 day case rate indicator is at the minimal alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise, which should begin to offer the community some level of protection. The more aggressive variants of COVID-19 have been identified in Alaska. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Pod 3a kicked off today and will conclude tomorrow. The targeted number of doses to be delivered during the POD is 2,200. POD3b (second dose) is scheduled for April 2nd and 3rd. So far, everything is going smoothly.

POD 4a will begin on Monday (3/15) and run through Saturday (3/20). The second dose clinic (4b) will be scheduled for April 5 –11. This clinic is made possible through a cooperative effort with SEARHC.

POD 5a is scheduled for Tuesday, March 23rd. 800 doses of Pfizer will be available. Registration for this clinic opens on Monday, March 15th at noon. Appointments can also be scheduled through the hotline. The second dose clinic (5b) will be held on Tuesday, April 13th.

Reports on the number of passengers and airport testing is included at the end of this report.

The BRH testing machine is processing symptomatic tests for the community. Discussions are underway with other testing entities to transfer test processing to the local machine. The hope is to have most testing conducted in Juneau turned around in 24 hours or less.

Daily Numbers Report: We are reporting 1 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	14	1,150	5	1,169
Nonresident	0	143	0	143
Total	14	1,293	5	1,312

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 1 new resident cases and no new nonresident case today. The reported case is secondary transmission.

The State is reporting 113 new cases today bringing the statewide cumulative total to 60,265 cases.

Testing: We are still working through testing reporting now that we've switched over to BRH.

34.8% of the Juneau population age 16 and above have been vaccinated with 27.7% of the population having received their 2nd dose. The State is reporting that 81.9% of the population in Juneau age 65+ have received at least the first dose of vaccine.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website

State of Alaska Airport COVID-19 Testing

Juneau International Airport Data Summary

Data Collected 3.11.21
