Situation Assessment: Our 14 day and 7 day case rate indicators are at the moderate alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise, which should begin to offer the community some level of protection. The more aggressive variants of COVID-19 have been identified in Alaska. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Weekly Summary – 14 day lookback for positive tests collected March 1st –March 14th.

Over the last rolling 14 day period, 28 people tested positive for COVID-19 in the community.

Highlights:

7% of the cases were associated with a small business cluster. The small business cluster reached 11 positives with all individuals now recovered.

29% of the cases were designated as community spread, 32% of the cases were designated as Secondary Infection, 21% of the cases were associated with Travel, and the remaining 18% of the cases remain under investigation.

Contact tracing is improving with 100% of individuals being contacted within 24 hours of a positive test being returned.

Disease spread is across all age groups, most racial groupings, and is equally split between males and females (50%/50%).
Disease Acquisition:

Of the 28 positive cases during the last 14 day period, 8 were identified as community spread, 9 were identified as secondary transmission, 6 was identified as travel related, and 5 remain under investigation.

Assembly EOC Update
CBJ COVID-19 Response

**Issues of Note:**
Pod 3a concluded over the weekend. 2140 doses were administered. POD3b (second dose) is scheduled for April 2\textsuperscript{nd} and 3\textsuperscript{rd}.

POD 4a began today and runs through Saturday (3/20). The second dose clinic (4b) will be scheduled for April 5 –11. This clinic is made possible through a cooperative effort with SEARHC. We anticipate 2200 doses will be administrated.

POD 5a is scheduled for Tuesday, March 23\textsuperscript{rd}. 1100 doses of Pfizer will be available. Registration for this clinic opened today at noon and at the time this report was sent, there were approximately 150 appointments left. Appointments can also be scheduled through the hotline. The second dose clinic (5b) will be held on Tuesday, April 13\textsuperscript{th}.

We expect to know about April allocations by the end of the week. Planning for April PODs is underway.

**Daily Numbers Report:** We are reporting 10 new cases today.

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

**Disease Transmission/Contact Tracing:**
We are reporting 10 new resident cases and no new nonresident case today. 1 case is community spread, 1 case is secondary transmission, 1 case is travel and the remaining 7 are under investigation.

The State is reporting 98 new cases today bringing the statewide cumulative total to 60,651 cases.

**Testing:** We are still working through testing reporting now that we’ve switched over to BRH.

22.6\% of the total population of Juneau is fully vaccinated.

38.8\% of the Juneau population age 16 and above has received at least 1 dose of vaccine and 28.2\% of the age eligible population is fully vaccinated. The State is reporting that 81.9\% of the population in Juneau age 65+ have received at least the first dose of vaccine.
This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (https://globalepidemics.org/key-metrics-for-covid-suppression/) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
