FROM: Mila Cosgrove, Incident Commander
RE: Situational Update –Level 1 Minimal- Operational Period 31 (03/25/21 – 04/22/21)

Situation Assessment: Our 14 day and 7 day case rates are at the moderate alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise which offers the community some level of protection. The more aggressive variants of COVID-19 have been identified in Alaska. Case rates are climbing statewide. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note: We are reporting 18 new cases over the last two days. 8 of the cases are associated with the mining industry and testing occurred while the individuals were quarantined. The EOC is watching cases carefully to determine if the community risk level is elevating.

Cases are increasing statewide. One case of B117 has been identified in Southeast Alaska. The case is not from Juneau. Residents are cautioned to test upon return to the community even from intrastate travel.

The EOC is working on revised Community Risk Mitigation Measures to be presented at the Assembly Committee of the Whole meeting on April 12th.

Planning for smaller, more targeted PODs is underway.

The CBJ survey on vaccines runs through Sunday, April 11th.

POD Information: POD (8) is scheduled for Saturday, April 17th from 10:00 am to 3:00 pm at Centennial Hall. Anyone age 16 and up is eligible to participate. The second dose clinic (8b) will be held on May 8th. Registration is currently open and there are 450 appointments available.
POD 5b runs through Saturday, April 10. This is a second dose clinic.

POD 6A runs through Thursday, April 8. Clinic hours are from 10:00 – 2:00. Registration for this clinic is open. Walk-in traffic is being accommodated. POD 6B (Second dose clinic) is scheduled for April 26 – 29.

POD 7A: Will be held on April 9. This is a closed POD for age eligible High School students. POD 7A (Second dose clinic) will be held on April 30. Registration for these clinics is through the School District.

**Daily Numbers Report:** We are reporting 18 new cases today (Monday 1:00 pm to Wednesday 1:00 pm).

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

**Disease Transmission/Contact Tracing:**
We are reporting 13 new resident cases and 5 new nonresident cases. 4 cases are community spread, 6 are secondary infection, and 8 remain under investigation. It is likely that at least 2 of the under investigation cases will be travel related. The non resident cases are all associated with the mining industry as are 3 of the resident cases. All individuals with the mining industry were under quarantine so there is no community exposure.

That State is reporting 223 new cases today bringing the statewide total to 64,303 cases. This is a total of 302 new cases since the last EOC report.

49.4% of the of the total population of Juneau has received at least 1 dose of vaccine and 34.5% are fully vaccinated.

61.1% of the Juneau population age 16 and above have received at least 1 dose of vaccine and 42.7% of the age eligible population is fully vaccinated.

The State is reporting that 83.4% of the population in Juneau age 65+ is fully vaccinated.
This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (https://globalepidemics.org/key-metrics-for-covid-suppression/) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
