 RE: **Situational Update –Level 1 Minimal-** Operational Period 31 (03/25/21 – 04/22/21)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 1 - Minimal	Overall cases rates are increasing. Community spread is present. Vaccine is available.	The hospital case load is stable.	Contact tracing is stable.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

Situation Assessment: Our 14 day and 7 day case rates are at the moderate alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise which offers the community a level of protection. A variant of concern (UK/B1.1.7) has been identified in Juneau. Case rates are statewide are high but beginning to even out. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Planning for alternate POD sites continues as does communication and marketing around vaccines. Enrollment in the current PODs is slow but steady. Overall, 56% of the Juneau population has received at least one dose of vaccine. We expect that 50% of the population will be full vaccinated (series complete +2 weeks) by May 14th.

The Vaccination planning team is planning logistics for a May vaccine POD through the School District. We are anticipating that the Pfizer vaccine will be authorized for ages 12 – 15 in early to mid May.

POD 9a is being held today from 1:00 pm to 7:00 pm at St. Brendan's Episcopal Church. The clinic is close to full. The second dose clinic (9b) will be held on May 7th.

POD 10 A will be at the UAS Recreation Center and run from April 20 – 24 from 1:00 pm to 7:00 pm. This clinic will use Pfizer. The second dose clinic (10b) will be May 15 – 18.

POD 8 A is scheduled for Saturday, April 17th from 10:00 am to 3:00 pm at Centennial Hall. Anyone age 16 and up is eligible to participate. The second dose clinic (8b) will be held on May 8th. Registration is currently open and there are 215 appointments available.

Daily Numbers Report: We are reporting 10 new cases today (Wednesday 1:00 pm – Friday 1:00 pm).

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	17	1,225	5	1,247
Nonresident	2	153	0	155
Total	19	1,378	5	1,402

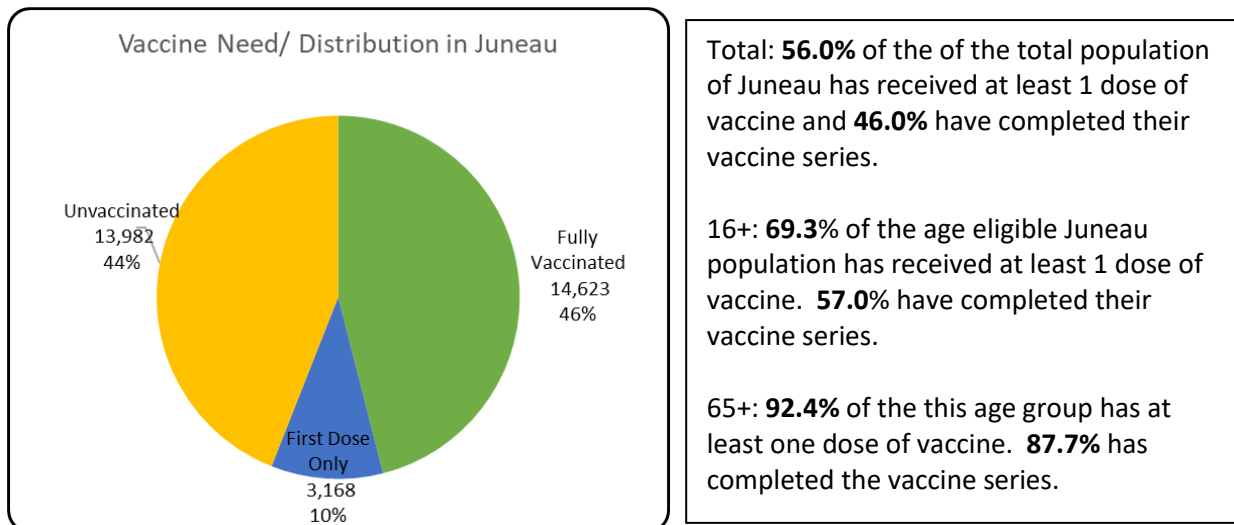

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 9 new resident cases and 1 new nonresident case. 2 cases are community spread, 1 case is travel, and 7 cases remains under investigation. 7 of the cases are associated with the mining industry. The day care cluster is at 10 positives with 2 recovered.

That State is reporting 201 new cases today bringing the statewide total to 65,921 cases. This is a total of 385 new cases since the last EOC report.

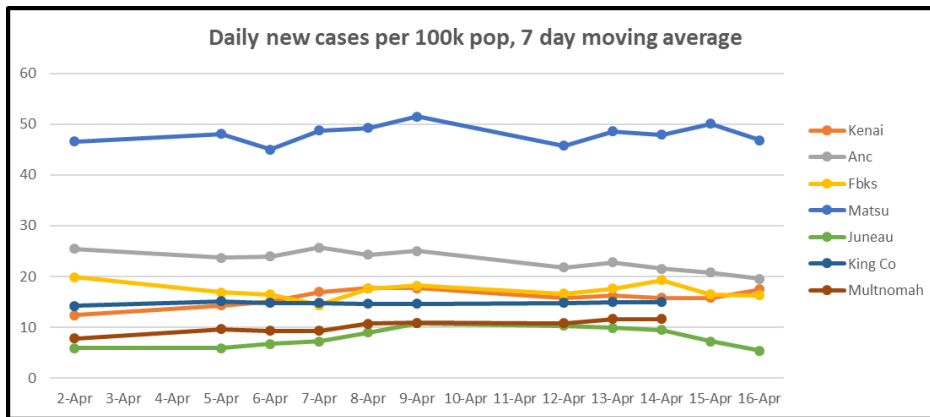

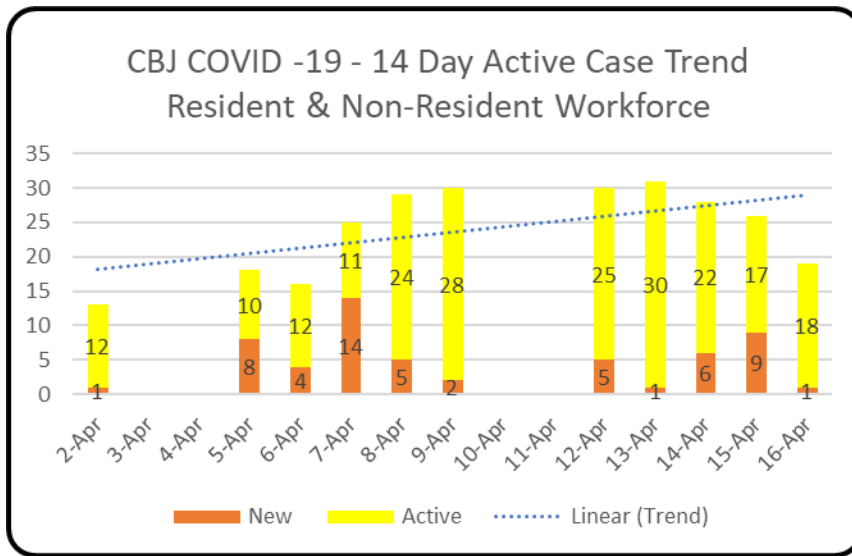

Testing: 158 COVID tests were processed at BRH between Wednesday afternoon and Friday morning, all returning in less than 24 hours.

Total: **56.0%** of the of the total population of Juneau has received at least 1 dose of vaccine and **46.0%** have completed their vaccine series.

16+: **69.3%** of the age eligible Juneau population has received at least 1 dose of vaccine. **57.0%** have completed their vaccine series.

65+: **92.4%** of the this age group has at least one dose of vaccine. **87.7%** has completed the vaccine series.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
