**Situation Assessment:** Our 14 day and 7 day case rates are at the moderate alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise which offers the community a level of protection. A variant of concern (UK/B1.1.7) has been identified in Juneau. Case rates are statewide are high but beginning to even out. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

**Issues of Note:**
A new cluster has been identified at TMHS. The total number of cases so far is at 7 though not all positive cases are directly connected to the school. Directly connected is defined as staff or student.

**Vaccine clinics:**
The Juneau Public Health Center, hosted a walk-in vaccine clinic at the Juneau International Airport yesterday. In all, 25 doses of vaccine were administered.

A walk in clinic at the Juneau Public Health Office was held today.

POD 10 A will be at the UAS Recreation Center and runs from April 22 – 24 from 1:00 pm to 7:00 pm. This clinic will use Pfizer. The second dose clinic (10b) will be May 13 - 15.

There will be two clinics downtown on Monday, April 26th. 12:00 – 4:30 at Resurrection Lutheran in coordination with their Foodbank hours. Also 5:00 – 6:30 at the Catholic Church on 5th street.

Second dose clinics for PODs 6b (4/26 – 4/29) at Centennial Hall and 7b (4/30) at the high schools run next week.
Daily Numbers Report: We are reporting 7 new cases today (Monday 1:00 pm – Wednesday 1:00 pm).

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:
We are reporting 7 new resident cases and no new nonresident cases. 1 case is community spread, 2 are secondary infection, and 4 cases remain under investigation. 4 of the cases are associated with the TMHS cluster which has 7 positive cases. The daycare cluster is at 10 positives with 6 recovered.

That State is reporting 201 new cases today bringing the statewide total to 66,390 cases. This is a total of 290 new cases since the last EOC report.

Testing: 138 COVID tests were processed at BRH between over the last two days, all tests returned in less than 24 hours.

Note there was a data adjustment on the State dashboard that removed about 200 1st dose cases from the Juneau dashboard.

Total: 56.8% of the total population of Juneau has received at least 1 dose of vaccine and 46.8% have completed their vaccine series.

16+: 70.3% of the age eligible Juneau population has received at least 1 dose of vaccine. 59.2% have completed their vaccine series.

65+: 93.2% of this age group has at least one dose of vaccine. 88.2% has completed the vaccine series.
This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (https://globalepidemics.org/key-metrics-for-covid-suppression/) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
