⁺ In May 2011 Disney Cruise Line's Disney Wonder called in Juneau for the first time and was unfamiliar with the TBMP noise guidelines as they applied to the Gastineau Channel.

In 2006 a number of previous records were broken for rain fall. May -4.56"; June -5.93"; July -4.43"; August -11.02"; September -13.01". The flightseeing industry was especially impacted by this bad weather.

* As of 2001 callers were asked to report emission concerns directly to the Alaska Department of Environmental Conservation (DEC). Calls left on the message line were forwarded to DEC and are included in the total calls shown for Cruise Ship Emissions in parenthesizes. However, only the calls left on the message line are included in the Total Calls.

** Two calls on the July 2008 Summary and Comparison were logged under cruise ships. On this report they have been linked with the Other category as Other Vessel complaints.
