

Monthly Report: September 2017

Type: Cruise Ship: Emissions	Call Date: September 13, 2017	Call #: 55- 42991	Caller ID: 55
Details of Concern:		Referred to: Norwegian Cruise Lines	

Hey good afternoon. Yes, this is **SMACK MANN** pestering again but I'm really concerned. The Norwegian Jewel is just pulling in and I think that ship is on fire. There is the most dark, grey to black smoke coming out of the stacks. And yes, I know it's underway so it can emit more air emissions but I've never seen such dark grey sooty-looking smoke. So maybe somebody needs to check if their engines are on fire. This is incredible. So, I will be following up with DEC. Wow. You guys aught to come down and look at this, it's amazing the smoke coming out of this ship. I'm glad I don't live downtown. Bye.

Details of Response:

Type: Other: Noise (Non-aircraft)	Call Date: September 15, 2017	Call #: 56- 42993	Caller ID: 56
Details of Concern:		Referred to: Alaska Travel Adventures	

This is **SUMMENDAL** I'd like to talk with somebody in charge of the rafting on the Mendenhall River. So please give me a call, thank you.

Details of Response:

ATA: To whom it may concern, I spoke with the caller and have addressed the concerns. Thank you.
