Subject: Cruise Terminal Reconfiguration
Attachments: CONCEPT 3I_prefered concept-revised 6-4-10.pdf

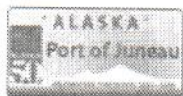

Hi Drew

Attached is the latest version of the Cruise Terminal area per the direction received from you and others at our recent meeting.

The new B and A/B zones work on the turning model but are tight. We've already identified a couple things we can do in the final design to increase the area for turning into those spots. I think this will work well. Please pass around to the others and let me know if this is a plan you can support.

On the restroom issue I have spoken to George at the Tram and he is open to discussing adding on to their existing facility. I will be having JYL Architects take a look at that as well as a new stand-alone facility in the area. This will give us some options and costs for consideration.

We plan to present this information to the Lands Committee on June 14 with the hope they will give direction to pursue final design.

Gary H. Gillette
