 RE: City & Borough of Juneau COVID-19 Response – Emergency Operations Center Update

**Situational Update – Incident Level 2 - Operational Period 16 (6/25/2020 – 7/9/2020).**

Disease Transmission/Contact Tracing:

There are three new resident cases being reported for Juneau today. One of these is an active case, the other represent individuals who died from COVID-19. Both decedents were in long term care facilities in different states when they passed away and both tested positive more than a week prior to death. The deaths were identified through a routine process of interstate sharing of death certificates that are routed to the appropriate state.

Contact tracing capability remains unconstrained.

Testing:

Staff and supplies are unconstrained.

Hospital Response:

BRH reports adequate supply of PPE and no concerns related to workforce availability. Effective 6/25, BRH is shifting to a 4 week operational period.

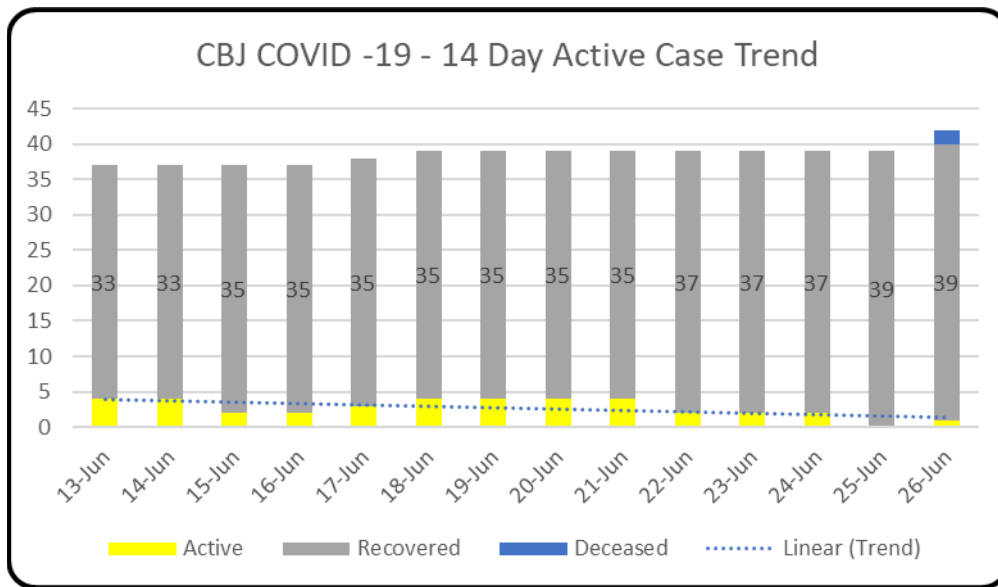

Issues of Note:

The airport testing team continues to work with the state through the testing backlog. Part of this work involves transitioning from a fax-based to a web-based communications portal, which should streamline communication about test results going forward.

Numbers changed from yesterday are highlighted.
