 RE: City & Borough of Juneau COVID-19 Response – Emergency Operations Center Update

**Situational Update – Incident Level 2 - Operational Period 16 (6/25/2020 – 7/9/2020).**

Disease Transmission/Contact Tracing:

There are no new cases reported in Juneau today and 27 new cases statewide. There are additionally 5 new statewide non-resident cases, none in Juneau.

DHSS reports they are at or near their upper limit on contact tracing capacity statewide, including locally. DHSS, in partnership with UAA, is hiring additional contact tracers. More information on contact tracing here: <https://www.uaa.alaska.edu/academics/college-of-health/departments/ACRHHW/>

Testing:

Staff and supplies are unconstrained. There are episodic shortages that are appearing around the country related to reagent. We continue to monitor that as an issue.

Hospital Response:

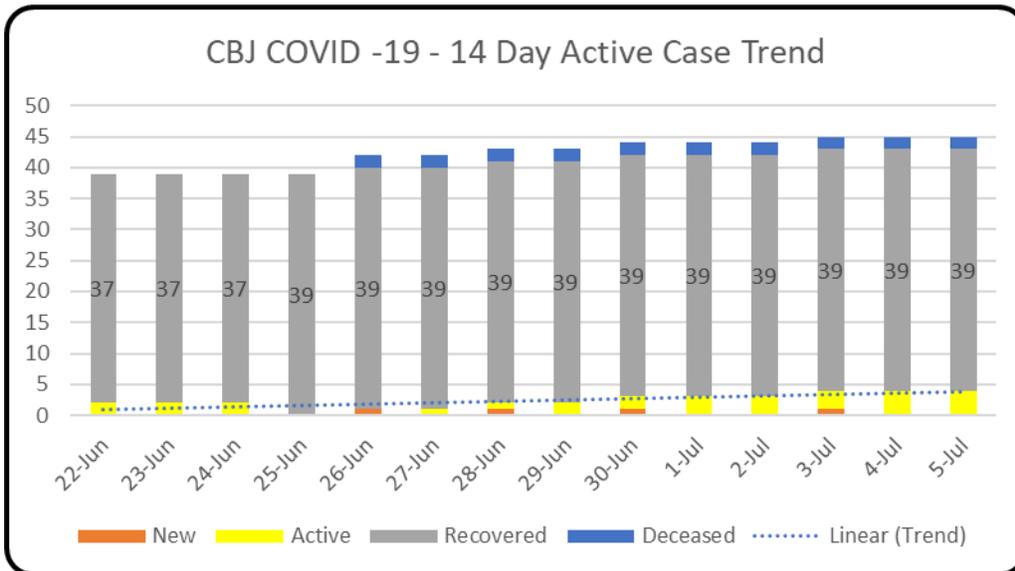

BRH reports adequate supply of PPE and no concerns related to workforce availability.

Issues of Note:

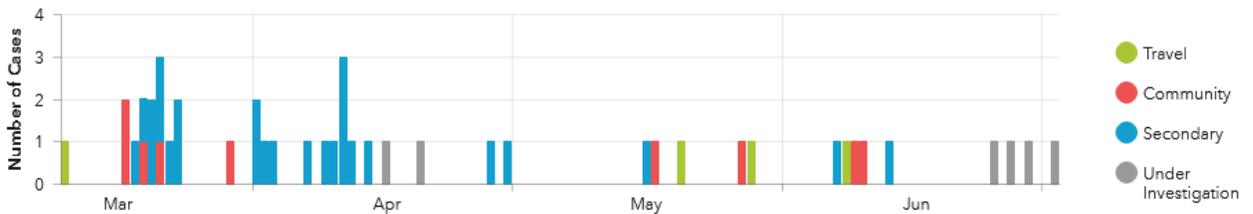

Note that the total number of non-resident cases decreased by 1 compared to yesterday's report. This is due to miscommunication about when an individual case was reported, not an actual change in the data. There are 5 known active cases (4 residents, 1 non-resident) in town.

Numbers changed from yesterday are highlighted.
