 RE: City & Borough of Juneau COVID-19 Response – Emergency Operations Center Update

Situational Update – Incident Level 2 - Operational Period 17 (7/9/2020 – 7/23/2020).

Disease Transmission/Contact Tracing:

There are three new resident cases reported in Juneau today and 93 new cases statewide. There are additionally 23 new statewide non-resident cases, none in Juneau.

Contact tracing continues to be strained statewide. More information on contact tracing here:

<https://www.uaa.alaska.edu/academics/college-of-health/departments/ACRHHW/>

Testing:

Staff and collection supplies are unconstrained. Recent test turnaround times have been between 3 and 7 days.

Hospital Response:

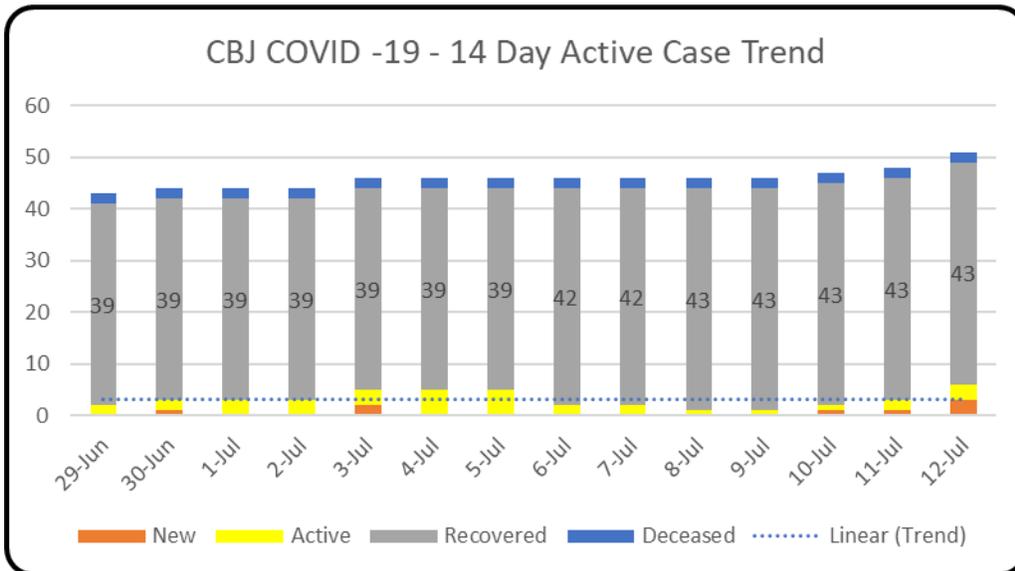

BRH reports adequate supply of PPE and no concerns related to workforce availability.

Issues of Note:

Both yesterday and today represent one-day statewide record increases in new cases. With increased local cases, increasing travel, and recent community-transmission cases, we assume community transmission is ongoing locally. Individual care (masking, handwashing, distancing, attention to symptoms) is increasingly important.

Numbers changed from yesterday are highlighted. The DPH PUI number is not updated over the weekend.

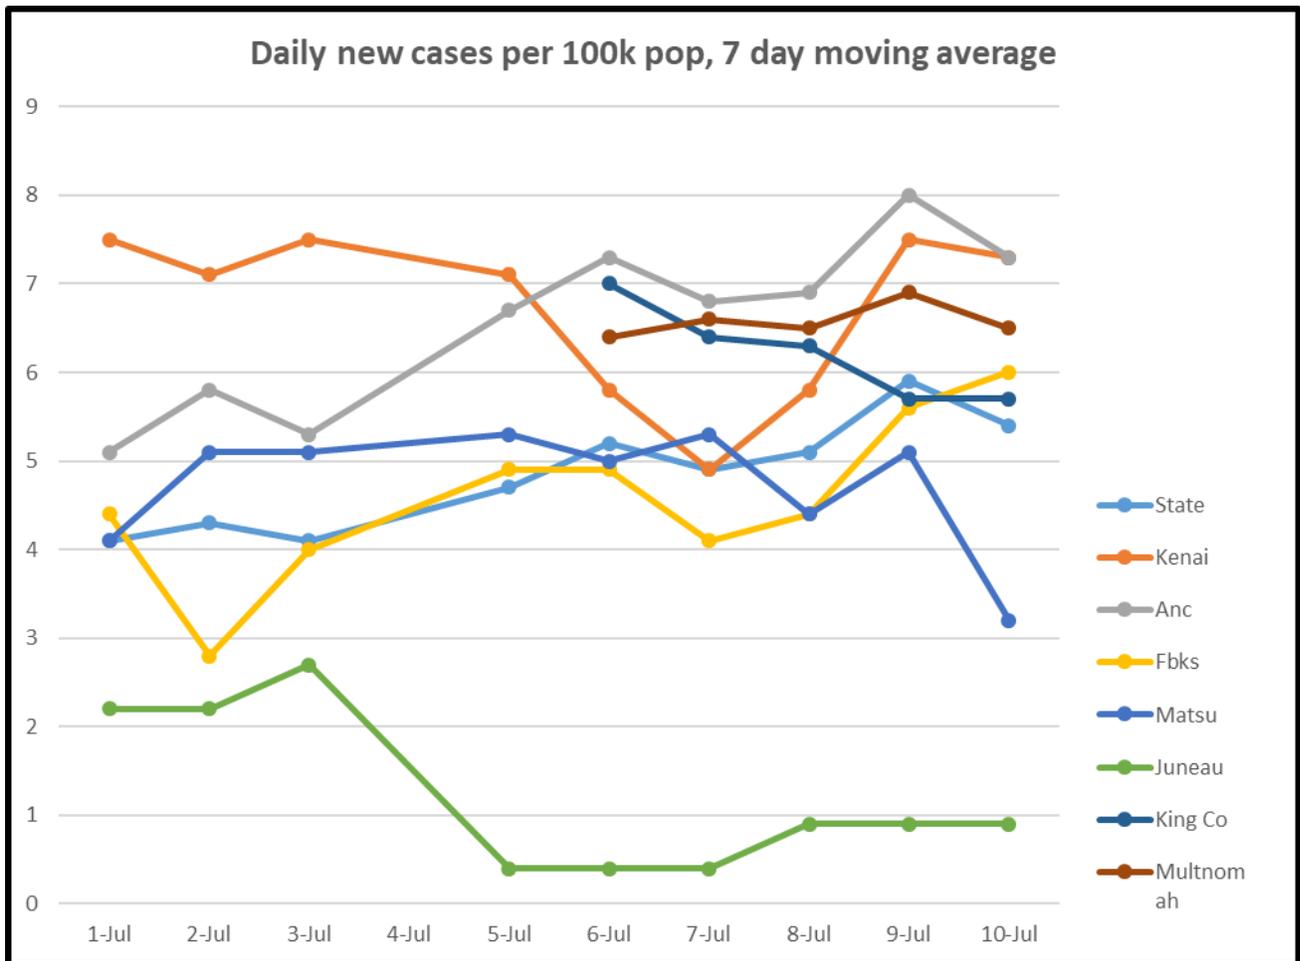

Category	Juneau		Statewide
Total Confirmed resident cases	51		1,479 (93+)
Recovered/Active resident	43	6	615 (17+)
Cumulative Tests & % of population tested	5,418	17%	145,475 (2,099+)
Average # of tests per day over the last 14 days	102.50	Up	
Positive tests over the last 14 days (# and % of positive)	7	0.49%	
DPH PUIs	57	Up	
Nonresident (Total positive/recovered or no longer in Juneau)	6	5	295 (23+)
Hospitalized COVID + (current)	0		27 (4-)
Ventilated Patients	0		
Fatalities	2		17

Acquisition of COVID-19

Positive cases are back dated by the Division of Public Health during their contact tracing phase to the day of onset of COVID-19 symptoms. CBJ & DHSS Dashboards which can be found at: www.Juneau.org/COVID-19

This graph tracks the number of new cases in the past 7 days, controlled for population. Other than Alaskan boroughs, King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency.

The source data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and is generally updated every other day. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.

Please note the recent uptick in cases over the weekend are not yet represented in this graph.
