 RE: City & Borough of Juneau COVID-19 Response – Emergency Operations Center Update

**Situational Update – Incident Level 2 - Operational Period 17 (7/9/2020 – 7/23/2020).**

Disease Transmission/Contact Tracing:

There are 62 new statewide resident cases being reported today and 16 new statewide non-resident cases. Within these numbers, 2 residents and 1 non-resident are attributed to Juneau; we reported 1 of the resident cases yesterday. The new resident case is in isolation and the new nonresident case is no longer present in Juneau.

Contact tracing continues to be strained statewide.

Testing:

Staff and collection supplies are unconstrained. The Anchorage lab continues to operate at half capacity and we expect turnaround times to increase in the coming days. Currently, we are seeing – on average – 4 day turnarounds.

Hospital Response:

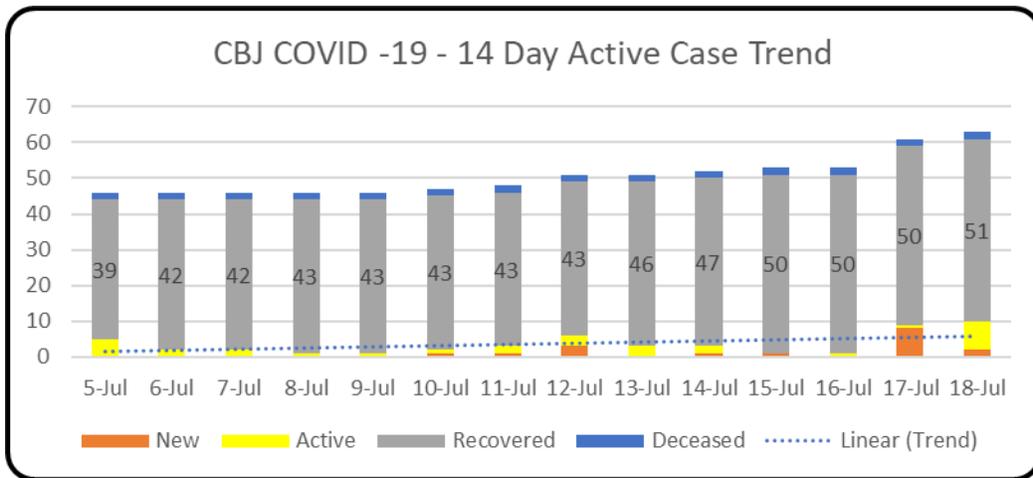

BRH reports adequate supply of PPE and no concerns related to workforce availability.

Issues of Note:

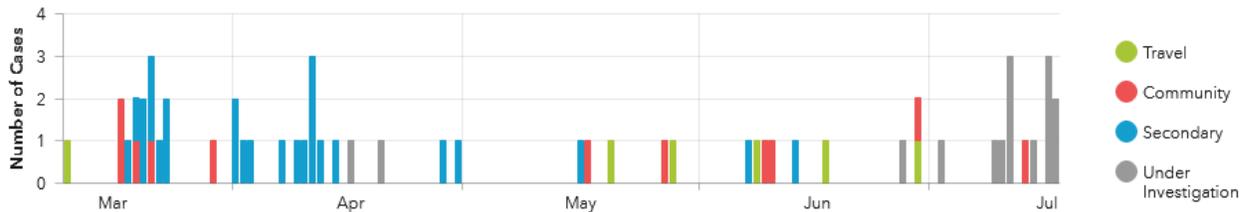

One new death statewide is being reported today.

Numbers changed from yesterday are highlighted. The DPH PUI # is not updated over the weekend.

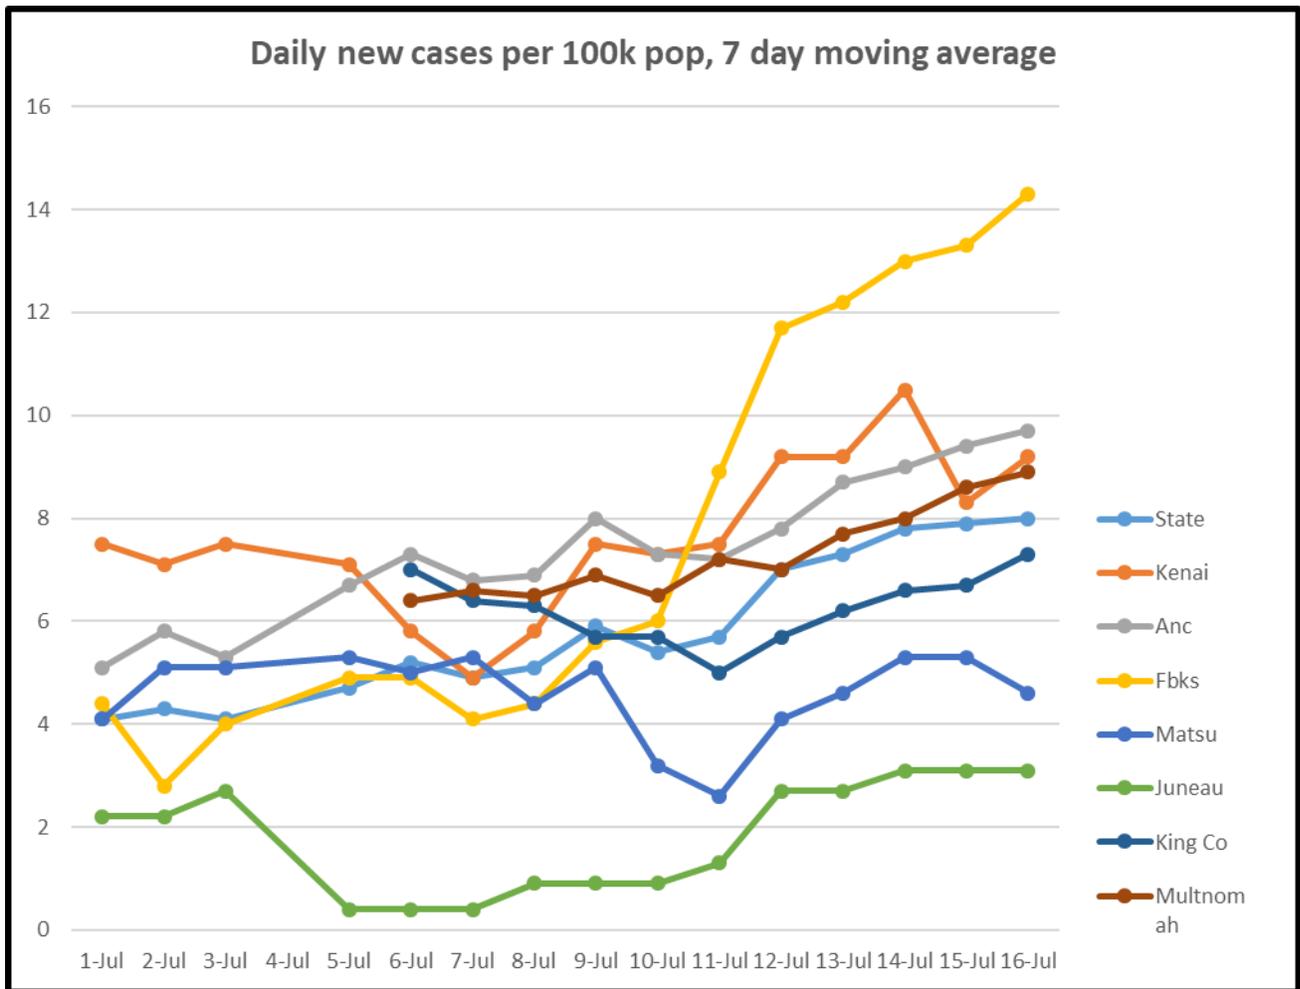

Category	Juneau		Statewide
Total Confirmed resident cases	58		1,795 (62+)
Recovered/Active resident	50	6	708 (10+)
Cumulative Tests & % of population tested	5,907	18%	168,363 (2,949+)
Average # of tests per day over the last 14 days	95.57	Up	
Positive tests over the last 14 days (# and % of positive)	17	1.27%	
DPH PUIs	38		
Nonresident (Total positive/recovered or no longer in Juneau)	11	7	364 (16+)
Hospitalized COVID + and PUI (current)	1		26 (6-)
Ventilated Patients	0		
Fatalities	2		18 (1+)

### Acquisition of COVID-19

Positive cases are back dated by the Division of Public Health during their contact tracing phase to the day of onset of COVID-19 symptoms. This graph includes resident cases only. CBJ & DHSS Dashboards which can be found at: [www.Juneau.org/COVID-19](http://www.Juneau.org/COVID-19).

This chart tracks the number of new cases in the past 7 days, controlled for population. Other than Alaskan boroughs, King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency.

The source data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and is generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
