RE:	City & Borough of Juneau COVID-19 Response – Emergency Operations Center Update

Situational Update – Incident Level 2 - Operational Period 17 (7/9/2020 – 7/23/2020).

Disease Transmission/Contact Tracing:

There are 75 new statewide resident cases being reported today and 66 new statewide non-resident cases. Within these numbers, 1 residents and 20 non-resident are attributed to Juneau. The reported non-resident cases are all associated with AGS. We've increased that number by 5 (to 25) in the table to account for the additional AGS cases.

Contact tracing continues to be strained statewide. It appears there is a bottleneck with onboarding new contact tracers. Our local public health staff are working actively to investigate the new cases associated with AGS.

Testing:

Staff and collection supplies are unconstrained. The Anchorage lab continues to operate at half capacity and we expect turnaround times to increase in the coming days. Currently, we are seeing – on average – 4 day turnarounds.

Hospital Response:

BRH reports adequate supply of PPE and no concerns related to workforce availability. They have 2 COVID positive patients currently in the hospital. They are not on ventilators. They will transfer them if they need for a higher level of care. BRH is restricting the number of visitors to one per patient.

Issues of Note:

DPH is still working with the Alaska Glacier Seafoods cluster. To recap, overall there have been a total of 36 positive cases associated with the event. The initial person who tested positive was a Juneau resident and DPH flagged the exposure as community spread. Following that positive, and additional 17 employees were tested. Of those, 9 came back positive – 4 of whom were residents and 5 of whom were nonresidents (note, this is a change the previously reported number of 8 positives). A second round of testing of the remaining 113 employees was conducted on July 15th. Over the weekend, 26 positive tests were reported; 1 is a resident and 25 are nonresidents. In addition, there are 10 tests still outstanding. We expect to hear those results shortly.

The spread of disease within the AGS cluster was accentuated by the fact that most individuals were asymptomatic and the fact that the nonresident workforce is housed in semi congregate living situations. AGS's COVID Mitigation Plan calls for masking at work, limiting off duty exposure to the community at large, and reporting any signs and symptoms of illness. DPH is reporting good employee compliance with those protocols.

Numbers changed from yesterday are highlighted. The DPH PUI # is not updated. A number of people they were following have dropped off their contact list but they are still determining how many will be added as a result of the AGS cluster.

Category	June	eau	Statewide	
Total Confirmed resident cases	64	+2	1,949 (75+)	
Recovered/Active resident	54	8	712 (-)	
Total Confirmed nonresident cases	37	+25	403 (37+)	
Recovered/Active nonresident cases	7	30		
Cumulative Tests & % of population tested	6,131	19%	175,586 (2,576+)	
Average # of tests per day over the last 14 days	83.86	Down		
Positive tests over the last 14 days (# and % of positive)	49	4.17%		
DPH PUIs	38			
Hospitalized COVID + and PUI (current)	2	+1	29 (2+)	
Ventilated Patients				
Resident Fatalities	2		18	

Note: Recent AGS cases not yet included

Acquisition of COVID-19

Positive cases are back dated by the Division of Public Health during their contact tracing phase to the day of onset of COVID-19 symptoms. This graph includes resident cases only. CBJ & DHSS Dashboards which can be found at: <u>www.Juneau.org/COVID-19</u>.

This chart tracks the number of new cases in the past 7 days, controlled for population. Other than Alaskan boroughs, King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency.

The source data is from the Harvard Global Health Institute (<u>https://globalepidemics.org/key-metrics-for-covid-suppression/</u>) and is generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
