DATE: August 9, 2020
 TO: CBJ Assembly
 FROM: Mila Cosgrove, Incident Commander
 RE: City & Borough of Juneau COVID-19 Response – Emergency Operations Center Update

Situational Update – Incident Level 2 - Operational Period 19 (8/6/2020 - 8/20/2020).

Disease Transmission/Contact Tracing:

The state is reporting 98 new statewide resident cases and 2 new statewide non-resident cases. Within these numbers, 3 resident and 3 non-resident cases are attributed to Juneau.

The CBJ EOC numbers are now the same for new resident and non resident cases. However, the state dashboard is significantly lagging in reporting other data such as the number of active and recovered cases. The CBJ dashboard is current on those numbers as of Friday. DPH does not generally report numbers over the weekend. There are a total of 29 active cases in the community. Detail regarding disease transmission is not available over the weekend.

Testing:

Staff and collection supplies have had episodic interruptions, but test results continue to come in generally in the 3 – 6 day range. 107 test results were received yesterday which were collected between July 30th and August 7th, 1 – 9 days after collection. 80 tests were from August 5th, 20 tests were from August 6th, and the remaining tests were spread over the full time frame.

Hospital Response:

BRH reports adequate supply of PPE and no concerns related to workforce availability.

Issues of Note:

No new information to report.

Numbers changed from yesterday are highlighted. Neither DPH nor BRH report numbers over the weekend.

Category	Juneau		Statewide
Total Confirmed resident cases	107	(+6)	3,711 (+98)
Recovered/Active resident	85	21	1,091 (+14)
Total Confirmed nonresident cases	72	(-)	762 (+2)
Recovered/Active nonresident cases	64	8	
DPH PUIs	130		
Cumulative Tests & % of resident population tested	8,257 (+61)	26%	277,919 (+4,326)

Average # of resident tests per day over the last 14 days	113.57	Up	
Total positive tests over the last 14 days	47	Down	
Average test turnaround time for CBJ testing operations/range	3 days	1-9 days	
Hospitalized COVID + and PUI (current)	1	1	31 +1)
Resident Fatalities	1		26 (-)

Resident Disease Acquisition

Positive cases are back dated by the Division of Public Health during their contact tracing phase to the day of onset of COVID-19 symptoms. CBJ & DHSS Dashboards can be found at: www.Juneau.org/COVID-19.

Non Resident Disease Acquisition

Positive cases are back dated by the Division of Public Health during their contact tracing phase to the day of onset of COVID-19 symptoms. CBJ & DHSS Dashboards can be found at: www.Juneau.org/COVID-19.

This chart tracks the number of new cases in the past 7 days, controlled for population. Other than Alaskan boroughs, King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency.

The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and is generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website.
