 RE: **Situational Update –Level 2 Moderate** - Operational Period 20 (8/20/2020 - 9/3/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 Moderate	Outbreaks are ongoing but controlled. Community spread based cases are occurring at low rates.	Hospital capacity is good and the general situation at the hospital is stable.	The testing environment is stabilizing. Local investigations are being conducted in a timely manner.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/COVID-19](#)

Situation Assessment: We continue to experience a steady number of new cases. Although our 14 day case rate indicator remains in the high category, the 7 day indicator has dropped back to moderate as the cases associated with several of our outbreaks begin to fall outside of the designated time frames.

Issues of Note:

The EOC continues to explore the possibility of shifting from the State lab to a commercial lab that may be able to provide a faster turnaround time. Conversations between the CBJ EOC, the State EOC/DHSS, and the commercial provider are ongoing.

There will be a Community Update scheduled for Thursday, August 27th at noon. Moving forward, Community Updates will be scheduled for Tuesdays at 5:00 pm.

Juneau reported 5 new cases today, one of the positive cases is not in state.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	19	148	1	168
Non Resident	0	94	0	94
Total	19	242	1	262

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

There are 5 new cases reported for Juneau today. The State is only reporting one new case for Juneau. CBJ is still leading the state dashboard numbers in reported nonresident cases. In addition, our recovered numbers continue to be larger than what is being reported by the state due to more timely local reporting.

The State of Alaska is reporting 37 new cases today bringing the statewide cumulative case count to 5,666.

Testing:

No test results were received yesterday as the state lab is closed for processing on Sundays. We continue to work through transport and processing issues with the State lab. In general, tests are being returned within 3-4 days. Occasionally tests are returned more quickly and a number of tests run significantly longer than 4 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and is generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website

Beginning 8/20/2020, Alaskan data includes resident and non resident cases.
