 FROM: Mila Cosgrove, Incident Commander  
 RE: **Situational Update –Level 2 Moderate** - Operational Period 21 (9/3/2020 – 9/17/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
<b>Level 3 High</b>	Community spread based cases are occurring at an increasing rate.	Hospital capacity is good and the general situation at the hospital is stable.	The testing environment is stabilizing. Local investigations are being conducted in a timely manner.

**The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/COVID-19](http://Juneau.org/COVID-19)**

**Situation Assessment:** We are experiencing a high volume of new cases, a significant number of which are attributed to community spread. Our 14 day and 7 day case rate indicators are at the high alert level. The community is urged to take appropriate cautions and in particular to refrain from indoor, unmasked activities with individuals outside of family/social bubbles

**Issues of Note:**

The popup testing center at Centennial Hall is fully operational through 5:00 pm today. Sample counts:  
 Friday: 283  
 Saturday: 168  
 Sunday: We don't have a final count yet, but the day was slower than the previous two.

The State lab in Fairbanks continues to have processing issues. They are back open but at a reduced rate. Some of our samples have been transferred to the Anchorage lab.

**Daily Numbers Report:**

Public Health does not report cases over the weekend.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	46	190	1	237
Non Resident	1	97	0	98
<b>Total</b>	<b>47</b>	<b>287</b>	<b>1</b>	<b>335</b>

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

There are no new resident and no nonresident cases reported for Juneau today. CBJ continues to show a higher number of resident and nonresident cases than what is reported on the state dashboard. In addition, our recovered numbers continue to be larger than what is being reported by the state. Both discrepancies are due to more timely local reporting.

The State of Alaska is reporting 62 new cases today bringing the statewide cumulative case count to 7,193.

Testing:

We did not receive updated testing numbers today.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
