 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High** - Operational Period 22 (9/17/2020 – 10/1/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 3 High	Community spread based cases are occurring at an increasing rate.	Hospital capacity is good and the general situation at the hospital is stable.	The testing environment is stabilizing. Local investigations are being conducted in a timely manner.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/COVID-19](#)

Situation Assessment: We are experiencing a high volume of new cases, a significant number of which are attributed to community spread. Our 14 day and 7 day case rate indicators are at the high alert level. The community is urged to take appropriate cautions and in particular to refrain from indoor, unmasked activities with individuals outside of family/social bubbles

Issues of Note:

C CFR completed 75 tests at the Glory Hall last night over the dinner distribution time.

Daily Numbers Report:

We are reporting 0 new cases today. DPH doesn't report numbers over the weekend and CBJ is still showing more cases than the state dashboard.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	43	222	1	266
Non Resident	0	98	0	98
Total	43	320	1	364

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

There are no new resident and no nonresident cases reported for Juneau today.

The state dashboard is showing lower numbers for both resident and nonresident cases than what is reported on the CBJ dashboard. In addition, our recovered numbers continue to be larger than what is being reported by the state. This is due to the timing of reporting. CBJ numbers are more accurate.

The State of Alaska is reporting 88 new cases today bringing the statewide cumulative case count to 7,674.

Testing:

18 test results were received collected on 9/12/2020. This is a 5 day turnaround time.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
