 RE: **Situational Update –Level 3 High** - Operational Period 22 (9/17/2020 – 10/1/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
<b>Level 3 High</b>	Community spread based cases are occurring at an increasing rate.	Hospital capacity is good and the general situation at the hospital is stable.	The testing environment is stabilizing. Local investigations are being conducted in a timely manner.

**The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/COVID-19](http://Juneau.org/COVID-19)**

**Situation Assessment:** We are experiencing a high volume of new cases, a significant number of which are attributed to community spread. Our 14 day and 7 day case rate indicators are at the high alert level. The community is urged to take appropriate cautions and in particular to refrain from indoor, unmasked activities with individuals outside of family/social bubbles

**Issues of Note:**

All of the tests taken at the Glory Hall on Friday have come back negative. There will be a repeat round of testing conducted on Friday the 25<sup>th</sup>. In addition, patrons from this demographic using Front Street Clinic or the BRH Emergency Room for medical services will also be tested if they haven't been already.

The Glory Hall has closed out of an abundance of caution and moved their remaining patrons into hotel rooms. They will continue to offer food distribution but have closed for day services. Our Quarantine and Isolation team has a plan in place to stand up Centennial Hall if needed.

Airport passenger numbers continue to drop. There is a chart at the end of this report.

**Daily Numbers Report:**

We are reporting 3 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	30	244	1	275
Non Resident	0	98	0	98
<b>Total</b>	<b>30</b>	<b>342</b>	<b>1</b>	<b>373</b>

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

There are 3 new residents and no nonresident cases reported for Juneau today. The cases are under investigation.

The state dashboard is showing a lower number of resident cases and nonresident cases than what is reported on the CBJ dashboard. In addition, our recovered numbers continue to be larger than what is being reported by the state. This is due to the timing of reporting. CBJ numbers are more accurate.

The State of Alaska is reporting 50 new cases today bringing the statewide cumulative case count to 7,886.

Testing:

97 test results were received with collection dates between 9/11/2020 – 9/17/2020. This represents a 4 – 10 day turnaround time. The 10 day return was an outlier. The majority of tests returned in 4 – 5 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
