FROM: Mila Cosgrove, Incident Commander

RE: **Situational Update –Level 2 Moderate** - Operational Period 23 (10/1/2020 – 10/15/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to Juneau.org/COVID-19
Level 2 Moderate	Community spread based cases are occurring.	Hospital capacity is good and the general situation at the hospital is stable.	The testing environment is stabilizing. Local investigations are being conducted in a timely manner.	

Situation Assessment: Both our 14 day and 7 day case rate indicators have increased to the moderate level (5.36 and 5.5 respectively). The disease is transferring by community spread - people are urged to take appropriate cautions and in particular to refrain from indoor, unmasked activities with individuals outside of family/social bubbles. Further, travel related cases have increased. The community is encouraged to be COVID conscious while traveling and to follow strict social distancing upon return to the community until 2 negative test results are returned, or 14 days have passed, whichever is earlier.

Issues of Note:

The EOC is managing the vulnerable population cluster over the weekend. Testing was conducted yesterday at Housing First, AWARE, and the Glory Hall. JPD foot patrol officers encouraged our transitory populations that hang out in the downtown core to participate in testing or go to Front Street Clinic. We continue to work on communicating across the population.

Statewide COVID positive cases are increasing. The state reported 232 new cases today.

Daily Numbers Report:

We are reporting no new cases today. DPH doesn't report numbers over the weekend and CBJ dashboard numbers are still ahead of the state's reporting.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	30	290	2	322
Non Resident	1	100	0	101
Total	31	390	2	423

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

There are no new resident and no new nonresident cases reported for Juneau today.

The state dashboard is showing a lower number of resident cases and nonresident cases than what is reported on the CBJ dashboard. In addition, our recovered numbers continue to be larger than what is being reported by the state. This is due to the timing of reporting. CBJ numbers are more accurate.

The State of Alaska is reporting 232 new cases today bringing the statewide cumulative case count to 10,428.

Testing:

No testing data was reported today.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
