 RE: **Situational Update –Level 3 High-** Operational Period 25 (10/29/2020- 11/12/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to Juneau.org/COVID-19
Level 3 - High	Community spread based cases continue to occur at an increasing rate and containment is uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	

Situation Assessment: Our overall number of positive cases continue to climb. Our 7 and 14 day case rate indicators are in the very high alert level range. The disease is traveling within two distinct clusters as well as family groupings. Contact tracing is impaired due to caseload statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members.

Issues of Note:

The Persons Experiencing Homelessness (PEH) cluster is now at 93 cases with 86 people recovered. There are 4 people are at Centennial Hall in isolation. Another round of testing is underway today.

The Mendenhall Auto cluster is up to 41 cases with 11 individuals recovered.

Daily Numbers Report:

We are reporting 4 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	96	485	3	584
Non Resident	1	105	0	106
Total	97	590	3	690

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are reporting 3 new resident and 1 new nonresident cases today. 1 of the new cases is a secondary transmission, and the remaining 3 are under investigation.

The State of Alaska is reporting 504 new cases today bringing the statewide cumulative case count to 18,699.

Testing:

In total 169 test results were received with collection dates of 10/31/2020 – 11/3/2020, returning results to individuals 2-5 days after collection.

- 37 test results were received from the Alaska State Lab with a collection dates of 10/31/2020 – 11/2/2020, returning results to individuals 3-5 days after collection.
- 132 test results were received from the Fulgent lab with collections dates of 11/2/2020 – 11/3/2020, returning results to individuals 2-3 days after collection.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
