 TO: CBJ Assembly
 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High-** Operational Period 25 (10/29/2020- 11/12/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to Juneau.org/COVID-19
Level 3 - High	Community spread based cases continue to occur at an increasing rate and containment is uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	

Situation Assessment: Our overall number of positive cases continue to climb. Our 7 and 14 day case rate indicators are in the very high alert level range. The disease is traveling within two distinct clusters as well as family groupings. Contact tracing is impaired due to caseload statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members.

Issues of Note:

Testing of the homeless population was conducted on Friday. Results should be returned Tuesday or Wednesday.

Daily Numbers Report:

We do not get updates from Public Health over the weekend. The State dashboard continues to lag the CBJ dashboard.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	96	485	3	584
Non Resident	1	105	0	106
Total	97	590	3	690

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are not reporting numbers for Juneau today.

The State of Alaska is reporting 604 new cases today bringing the statewide cumulative case count to 19,306.

Testing:

Test information will be provided on Monday

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
