 RE: **Situational Update –Level 3 High-** Operational Period 25 (10/29/2020- 11/12/2020)

Level 3 - High	Community spread based cases continue to occur. The containment situation is improving but remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	The Complete CBJ COVID-19 Dashboard can be found here or by going to Juneau.org/COVID-19
-----------------------	---	-----------------------------------	--	---

Situation Assessment: Our 7 and 14 day case rate indicators are in the very high alert level range. The disease is traveling within two distinct clusters as well as family groupings. Contact tracing is impaired due to caseload statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members.

Issues of Note:

The Persons Experiencing Homelessness cluster is up to 93 cases with 88 people recovered. There are 3 individuals at Centennial Hall in isolation and another 5 close contacts are quarantining in other locations. There were no new positives out of the round of testing that was conducted last Friday. Another round of testing will be conducted on November 13th.

The Mendenhall Auto cluster is up to 46 cases with 25 people recovered.

We are on track to take possession of the Roche 6800 on December 7th. Planning is on pace to assure the facility work is completed and the staffing is in place to operate the machine.

Daily Numbers Report:

We are reporting 17 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	71	543	3	617
Non Resident	1	105	0	106
Total	72	648	3	723

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are reporting 17 new resident cases and no new nonresident cases today. 8 of these cases are secondary transmission, 2 are travel related, and the remainder are under investigation.

The State of Alaska is reporting 531 new cases today bringing the statewide cumulative case count to 20,832.

Testing: 10/9: In total 45 test results were received with collection dates of 11/6/2020 – 11/7/2020, returning results to individuals 2-3 days after collection.

- No test results were received from the Alaska State Lab.
- 45 test results were received from the Fulgent Lab with collections dates of 11/6/2020 – 11/7/2020, returning results to individuals 2-3 days after collection.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
