 RE: **Situational Update –Level 3 High-** Operational Period 26 (11/12/2020 – 12/3/2020)

<b>Level 3 - High</b>	Community spread based cases continue to occur. The containment situation is improving but remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	<b>The Complete CBJ COVID-19 Dashboard can be found <a href="#">here</a> or by going to <a href="http://Juneau.org/COVID-19">Juneau.org/COVID-19</a></b>
-----------------------	---	-----------------------------------	--	--

**Situation Assessment:** Our 7 and 14 day case rate indicators are in the very high alert level range. The disease is moving via travel and family groupings. Contact tracing is impaired due to caseloads statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members.

**Issues of Note:**

Cases continue to climb around the state – today DHSS reported 637 new cases. Anchorage hospitals are near capacity and we are tracking that closely to understand the impact on local ability to medevac.

The UAS cluster is evolving. Currently there are 7 COVID positive cases (6 in town, 1 out of town). Our mobile testing team tested 35 people on campus today. We expect results back by Thursday or Friday.

Commercial air passenger traffic continues to drop. Passenger loads are included in a graph at the end of this report.

**Daily Numbers Report:**

We are reporting 5 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	50	616	4	670
Non Resident	3	107	0	110
<b>Total</b>	<b>53</b>	<b>723</b>	<b>4</b>	<b>780</b>

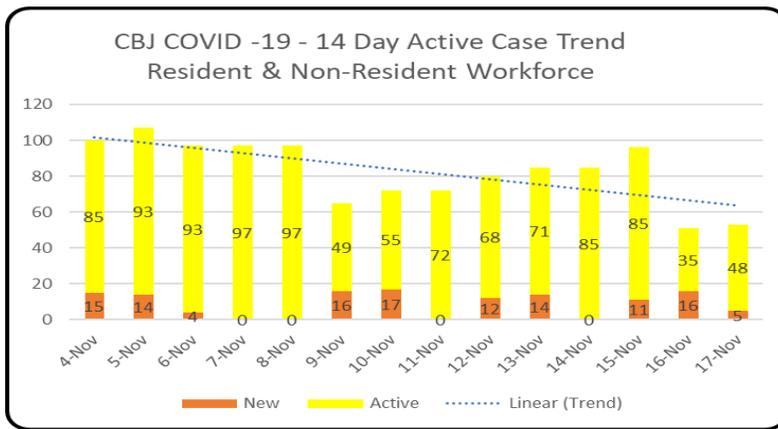

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

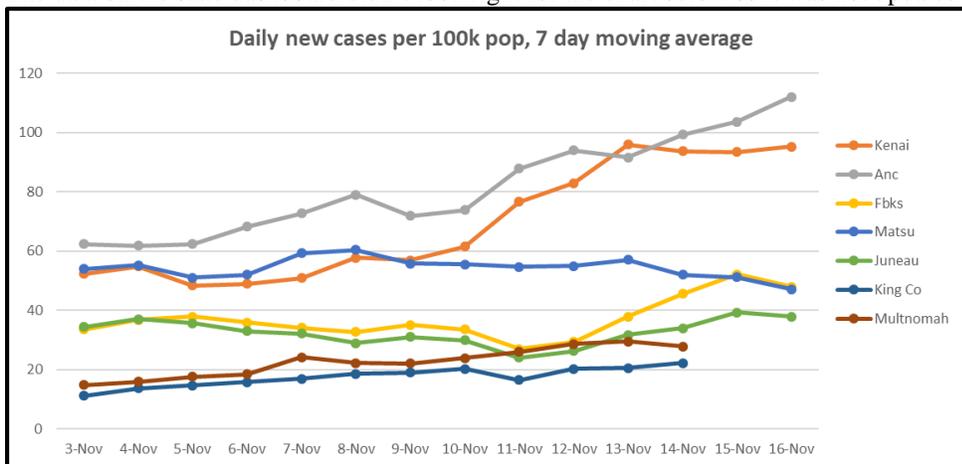

We are reporting 4 new resident cases and 1 new nonresident cases today: 2 are secondary transmission, the remaining cases are under investigation.

The State of Alaska is reporting 637 new cases today bringing the statewide cumulative case count to 25,041.

Testing: 169 test results were received from the Fulgent Lab with collection dates of 11/13/2020 – 11/14/2020, returning results to individuals 2-3 days after collection. No test results were received from the Alaska State Lab.

The data on the state dashboard didn't look right for the chart below so it was not updated today.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
