 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High-** Operational Period 27 (12/3/2020 – 12/31/2020)

Current EOC Assessment			
Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 3 - High	Community spread based cases continue to occur. The containment situation remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to Juneau.org/COVID-19

Situation Assessment: Our 14 day and 7 day case rate indicators are at the Very High alert level. The disease is moving across all disease acquisition types: secondary infection, travel and community. Contact tracing is improving slightly, but remains constrained due to caseloads statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members.

Issues of Note:

The hospital system in Alaska continues to be overburdened. Seattle hospitals are tight for space as well. BRH monitors this status on a daily basis and reports they are presently able to medevac if needed.

Asymptomatic testing at the Hagevig Fire Training Center continues. Individuals wishing to test can sign up on the CBJ website: Juneau.org/COVID-19.

Daily Numbers Report:

We are reporting no new cases today. Data is unavailable from the local public health office and the state dashboard is still behind in reporting.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	72	758	5	835
Non Resident	0	112	0	112
Total	72	870	5	947

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

The State of Alaska is reporting 756 new cases today bringing the statewide cumulative case count to 37,036.

Testing: Test results will be provided Monday, 12/7/20.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
