 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High-** Operational Period 27 (12/3/2020 – 12/31/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to juneau.org/COVID-19
Level 3 - High	Community spread based cases continue to occur. The containment situation remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	

Situation Assessment: Our 14 day and 7 day case rates are at the Very High alert. The disease is moving across all disease acquisition types: secondary infection, travel and community. Contact tracing is improving, but remains constrained due to caseloads statewide and the nature of contacts required. Residents must take appropriate cautions, including limiting social bubbles to immediate family members. The public should strictly adhere to all health orders related to travel.

Issues of Note:

Vaccine Update: Vaccinations began yesterday with health care workers and EMS staff. It will be ongoing through the remainder of this week and into the next week.

One of the 96 employees vaccinated at BRH yesterday evening had an anaphylactic reaction to the vaccine. The processes for such an event were all in place and she was under observation when it happened. She is doing well and will be discharged this PM. This is the 1st case in the US and she had no known allergies.

Daily Numbers Report:

We are reporting 3 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	27	858	5	890
Non Resident	0	115	0	115
Total	27	973	5	1005

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are reporting 3 new resident cases and no new nonresident cases. 1 case is travel related and the remaining 2 are under investigation. Also, one case from yesterday was removed due to the person residing in Anchorage.

The State of Alaska is reporting 616 new cases today bringing the statewide cumulative case count to 42,473.

Testing: 12/15: 381 test results were received from the Fulgent Lab with collection dates between 12/11/2020 – 12/13/2020, returning results to individuals 2-4 days after collection.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
