FROM: Mila Cosgrove, Incident Commander

RE: Situational Update –Level 3 High- Operational Period 27 (12/3/2020 – 12/31/2020)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ
Level 3 - High	Community spread based cases continue to occur. The containment situation remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	COVID-19 Dashboard can be found <u>here</u> or by going to Juneau.org/ COVID-19

Situation Assessment: Our 14 day case rate remains at the High alert level and our 7 day case rate has bumped to the Very High alert level. The disease is moving across all disease acquisition types: secondary infection, travel and community. Travel related cases are climbing. Residents must take appropriate cautions, including limiting social bubbles to immediate family members. The public should strictly adhere to all health orders related to travel.

Issues of Note:

There are no significant issues of note to report today.

The State of Alaska will not update the COVID dashboard on Christmas Day.

Daily Numbers Report:

We are reporting 7 new cases today.

COVID-19 In Juneau						
	Active	Recovered	Deceased	Cumulative		
Resident	49	876	5	930		
Non Resident	0	117	0	117		
Total	49	993	5	1047		

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are reporting 7 new resident and no new nonresident cases today. 1 case is associated with travel and the remaining cases are under investigation.

December 24, 2020 Assembly EOC Update CBJ COVID-19 Response

The State of Alaska is reporting 279 new cases today bringing the statewide cumulative case count to 45,104.

<u>Testing</u>: 12/23/20: 176 test results were received from the Fulgent Lab with collection dates between 12/20/2020 - 12/21/2020, returning results to individuals 2-3 days after collection
