Re: Harris Harbor Maintenance Dredging – Schedule Update

Dear Harbor Patron:

As previously notified by the City & Borough of Juneau Ports and Harbors Department, Western Marine Construction is under contract with the US Army Corps of Engineers Alaska District to perform maintenance dredging of the eastern portion of Harris Harbor. It is our understanding you were previously informed that the dredging work would be complete before Christmas 2020. Unfortunately, Western Marine has experienced delays in the progression of the dredging resulting from recent changes to USCG vessel regulations.

The USCG changes require WMC to make safety enhancements prior to completing the dredging work. These enhancements will push the completion for the dredging in Harris Harbor to mid-February 2021. Western Marine will work expeditiously to complete all of the work before this date, but we feel this is a realistic schedule. We apologize for the inconvenience this may cause. Please feel free to contact Joe Zech at our office with questions.

Sincerely,

Western Marine Construction
