DATE: January 5, 2021
 TO: CBJ Assembly
 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 3 High-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity	The Complete CBJ COVID-19 Dashboard can be found here or by going to Juneau.org/COVID-19
Level 3 - High	Community spread based cases continue to occur. The containment situation remains uncertain.	The hospital case load is stable.	Contact tracing efforts are constrained due to the nature and volume of cases.	

Situation Assessment: Our 14 day case rate is at the High alert level and our 7 day case rates has dropped to the Moderate alert level. The disease is moving across all disease acquisition types: secondary infection, travel and community. Travel related cases remain elevated. Residents must take appropriate cautions, including limiting social bubbles to immediate family members. The public should strictly adhere to all health orders related to travel.

Issues of Note:

Testing:

Asymptomatic testing is under way at the Fire Training Center. Total tested so far is 724. 519 tests have been processed, with 4 tests returning positive. The asymptomatic testing event will run through Jan. 10th.

Vaccines:

The State has published guidance on what populations will be included in Phase 1b. Phase 1b, Tier 1 will include all people who are 65+. The state has made registration available to those individuals in that age group beginning on Wednesday January 6th at noon with vaccinations as early as January 11th.

Vaccinations are currently happening for Phase 1a, Tier 3 – health care workers.

The EOC is planning for mass Point of Dispensing events in the eventuality the community has access to a sufficient number of vaccine doses to warrant such an event. Planning includes location, staffing, registration detail and other technology support, as well as specific logistics related to potential populations served.

Daily Numbers Report:

We are reporting 1 new case today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	29	932	5	966
Non Resident	0	120	0	120
Total	29	1052	5	1086

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are reporting 1 new resident case and no new nonresident cases. The case is considered secondary transmission.

The State is reporting 206 new cases today for a cumulative total of 48,560 cases.

Testing: 01/04/2021: 97 test results were received from the Fulgent Lab with collection dates between 12/31/2020 – 01/02/2021 – 28 tests returned in 2 days, 68 tests returned in 3 days, and 1 test returned in 4 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
