FROM: Mila Cosgrove, Incident Commander

RE: **Situational Update –Level 2 Moderate-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to Juneau.org/COVID-19

Situation Assessment: Our 14 day and 7 day case rates are at the Moderate alert level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Planning and logistics continue for the first mass Point of Dispensing (POD) event scheduled for January 15 – 17 at Centennial Hall. The planning team is developing a process for a short standby list in case there are no shows. Another clinic will be set up as soon as we have confirmation of more vaccine.

Capstone, the State's new contractor for Juneau airport testing and screening came through the airport to start planning for operations turnover. The EOC will be working on this over the next two weeks.

Daily Numbers Report:

We are reporting 2 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	12	968	5	985
Non Resident	0	125	0	125
Total	12	1093	5	1110

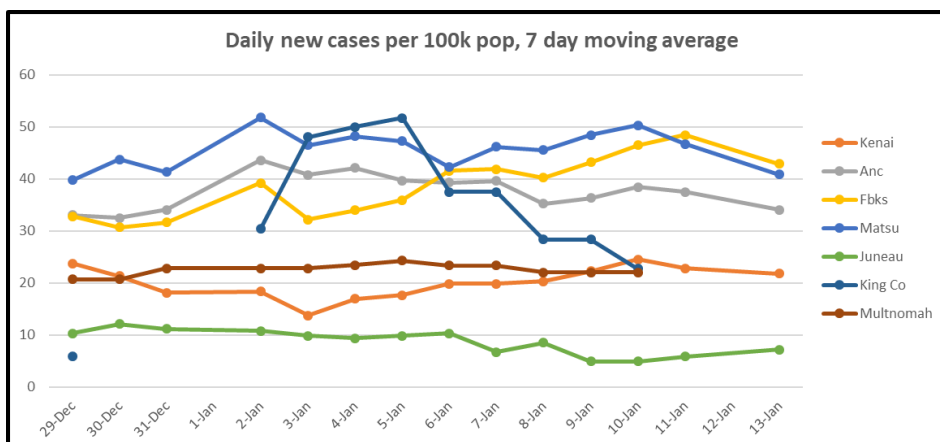

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

Disease Transmission/Contact Tracing:

We are reporting 2 new resident cases and no new nonresident cases today. Today's cases are under investigation.

The State is reporting 296 new cases today bringing the statewide cumulative total to 50,816 cases.

Testing: 01/12: 336 test results were received from the Fulgent Lab with collection dates between 01/09/2021 – 01/10/2021 – 186 tests returned at 2 days, and 150 tests returned at 3 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
