FROM: Mila Cosgrove, Incident Commander

RE: **Situational Update –Level 2 Moderate-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to Juneau.org/COVID-19

Situation Assessment: Our 14 day and 7 day case rates are at the Moderate alert level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Planning and logistics continue for the first mass Point of Dispensing (POD) event scheduled for January 15 – 17 at Centennial Hall. 200 individuals signed up for the waiting list. Another clinic will be set up as soon as we have confirmation of more vaccine.

Logistical details continue to be worked through for the standup of the Roche testing machine at BRH. A lot of details remain but we appear to be on schedule to begin operations around the 1st of February.

Another round of surveillance testing will be conducted for the Persons Experiencing Homelessness (PEH) group tomorrow. On a related note, Front Street Clinic (through SEARHC) will begin to vaccinate the PEH group as supplies allow.

Daily Numbers Report:

We are reporting 3 new cases today. Note: The state dashboard is reporting more cases for Juneau today. Local DPH officials believe there is a discrepancy in the state reporting. This may take a few days to iron out.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	15	968	5	988
Non Resident	0	125	0	125
Total	15	1093	5	1113

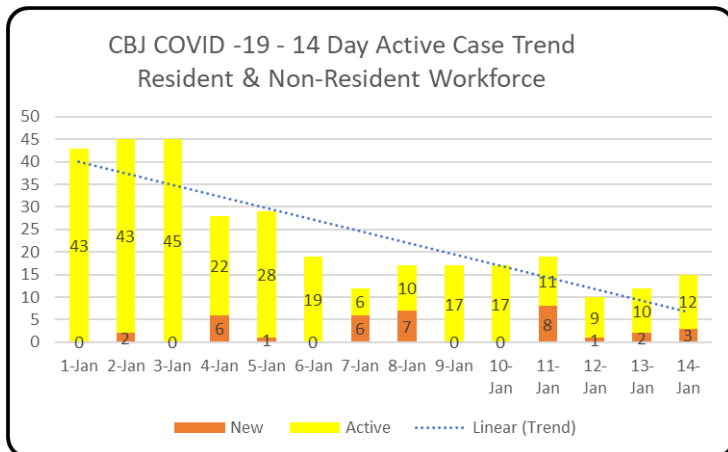

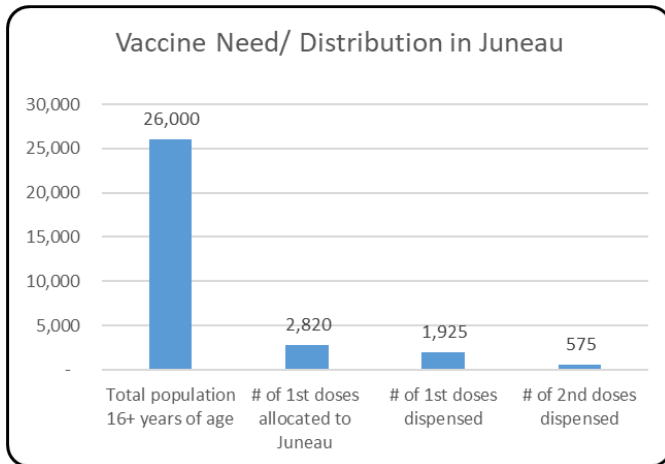

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard due to lags in data entry on the state level.

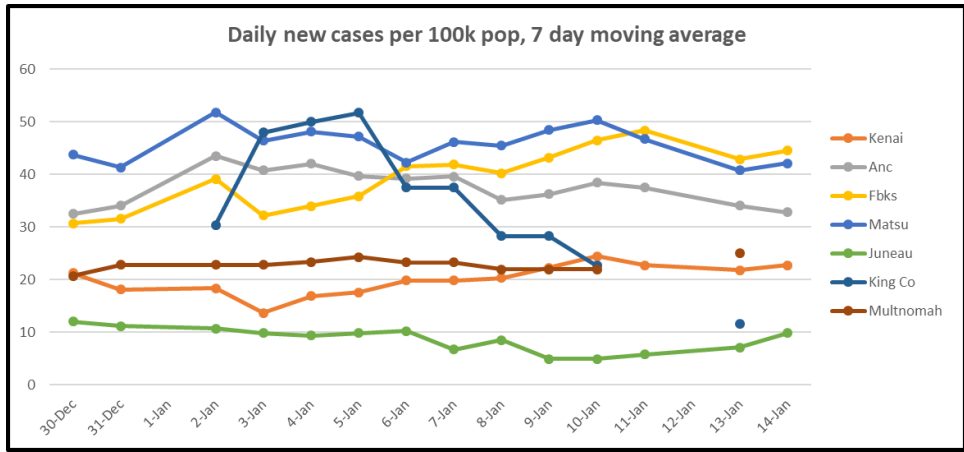

Disease Transmission/Contact Tracing:

We are reporting 3 new resident cases and no new nonresident cases today. 1 case is secondary transmission, 1 case remains under investigation, and one case is an older case that was not previously counted.

The State is reporting 341 new cases today bringing the statewide cumulative total to 51,147 cases.

Testing: 143 test results were received from the Fulgent Lab with collection dates between 01/10/2021 – 01/11/2021 – 74 tests returned at 2 days, and 69 tests returned at 3 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
