FROM: Mila Cosgrove, Incident Commander

RE: **Situational Update –Level 2 Moderate-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to Juneau.org/COVID-19

Situation Assessment: Our 14 day case rate is at the Moderate level and our 7 day case rates is in the High level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Our first mass Point of Dispensing (POD) was a success. Lots of positive feedback via email and social media. Operations went smoothly and overall, 1,182 doses were dispensed. The follow up clinic for the second does will be held February 5 – 7 at Centennial Hall.

We are seeing a slight uptick of positive cases and today our 7 day case average pushed into the High Level. The EOC will talk with DPH on Tuesday to determine case acquisition.

Daily Numbers Report:

We are reporting 2 new cases today. Note: The state dashboard is reporting 1 more case for Juneau today. Local DPH officials believe there is a discrepancy in the state reporting. This may take a few days to iron out.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	19	972	5	996
Non Resident	0	125	0	125
Total	19	1,097	5	1,121

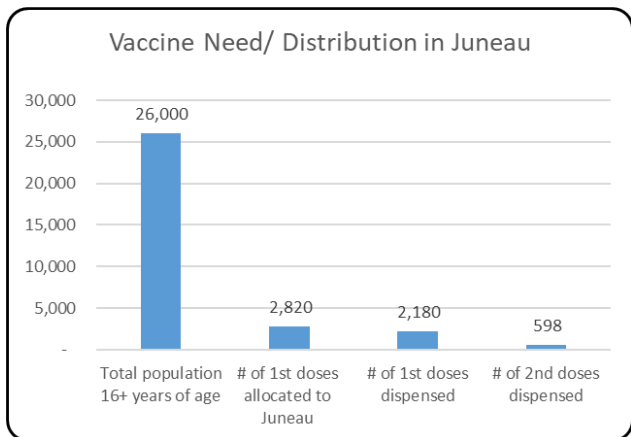

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

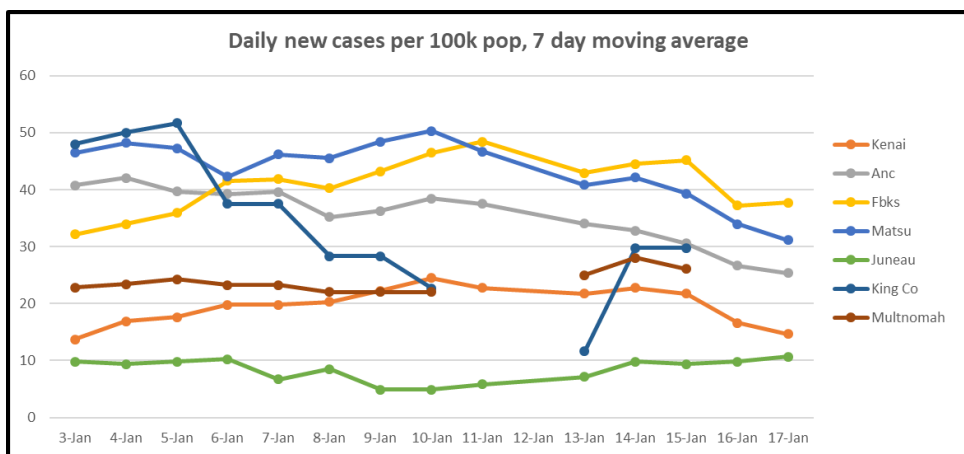

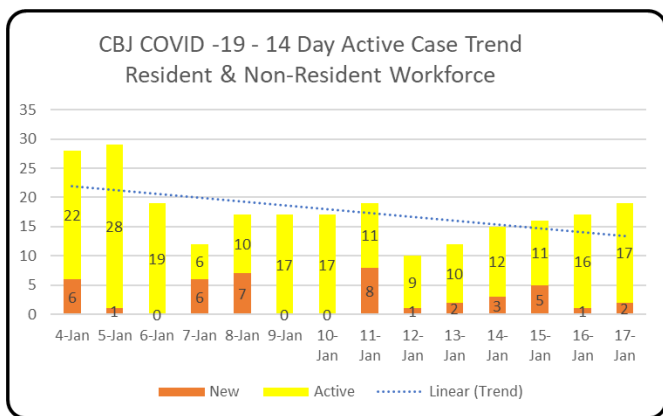

We are reporting 2 new resident cases and no new nonresident cases today. The new case is under investigation.

The State is reporting 271 new cases today bringing the statewide cumulative total to 51,938 cases.

Testing: Test results will be reported on Tuesday, January 19th.

Vaccine counts are updated on Monday, Wednesday & Friday through the State Dashboard.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
