RE: **Situational Update –Level 2 Moderate-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](https://juneau.org/covid-19) or by going to [Juneau.org/COVID-19](https://juneau.org/covid-19)

Situation Assessment: Our 14 day and 7 day case rate indicators are at the Moderate level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

We had a full, unified command meeting today.

BRH: Staff have been busy helping to plan and run the Centennial Hall vaccination clinic. Roche testing machine is in place with staff trained. They are working on refining the registration process. All other ancillary systems are on track for a go live date in February.

Vaccine: The EOC has made contact with all providers in Juneau who are currently dispensing vaccinations. It would appear that Juneau has dispensed around 4,000 first doses. Doses administered by the Coast Guard or the Veteran's Administration will not be entered into the statewide system. For the sake of consistency in reporting, the EOC will continue to use the numbers provided by the state.

Daily Numbers Report:

We are reporting 6 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	24	990	5	1019
Non Resident	2	125	0	127
Total	26	1,115	5	1,146

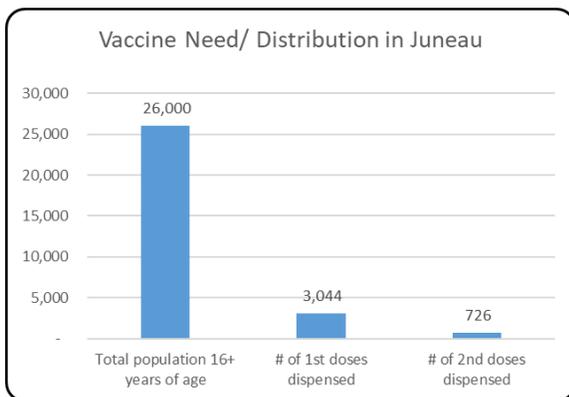

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

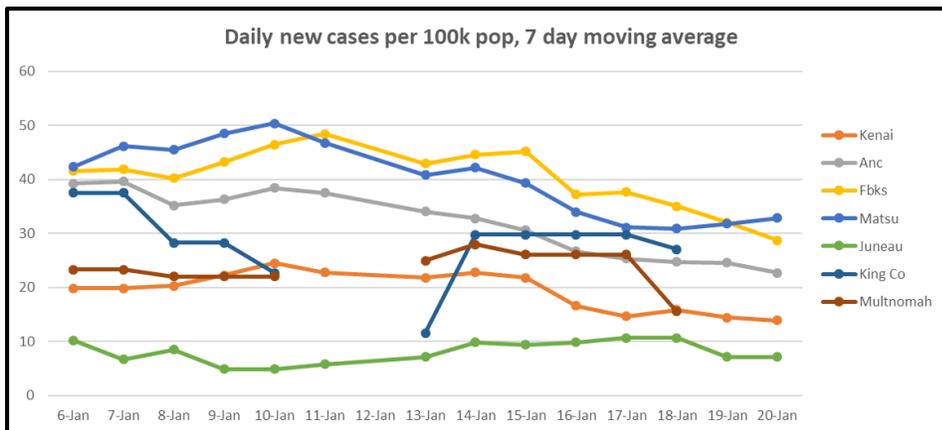

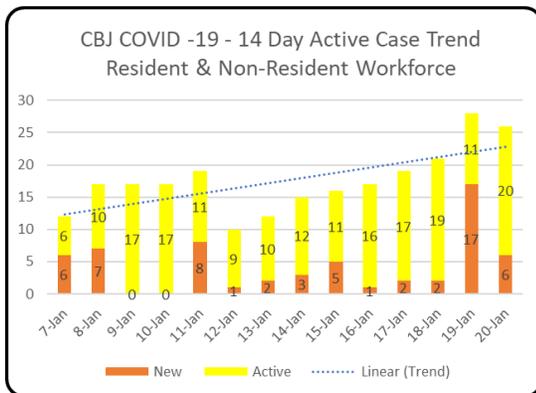

We are reporting 6 new resident cases and no new nonresident cases today. 2 cases are Juneau residents who are out of state and are considered travel related, 2 are community spread, 1 is secondary infection, and the remaining case is under investigation.

The State is reporting 167 new cases today bringing the statewide cumulative total to 52,393 cases.

Testing: 1/19/2021: 1 test result was received from the Fulgent Lab with a collection date of 01/18/2021, returning results to individual 1 day after collection.

Vaccine counts are updated on Monday, Wednesday & Friday through the State Dashboard.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
