RE: **Situational Update –Level 2 Moderate-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to Juneau.org/COVID-19

Situation Assessment: Our 14 day and 7 day case rate indicators have elevated to the High level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

We are seeing an uptick in cases. Based on discussions with Public Health we think remaining in Moderate status is still appropriate. A lot of the case activity is related to secondary infection or travel (people that should already be following quarantine strategies) and not significant community spread. In addition, DPH is also cleaning up records and as they do so, numbers may adjust. As an example, 2 of today's cases are old nonresident cases that had not previously been reported.

The EOC met with Public Health and Beacon (Legislative COVID contractor) to assure our procedures and communication strategies are well aligned. It was a positive meeting and we have very confidence that Beacon will work well with our existing framework.

Daily Numbers Report:

We are reporting 9 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	30	990	5	1,025
Non Resident	3	127	0	130
Total	33	1,117	5	1,155

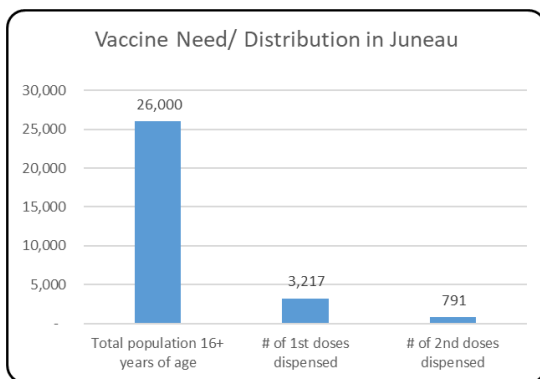

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

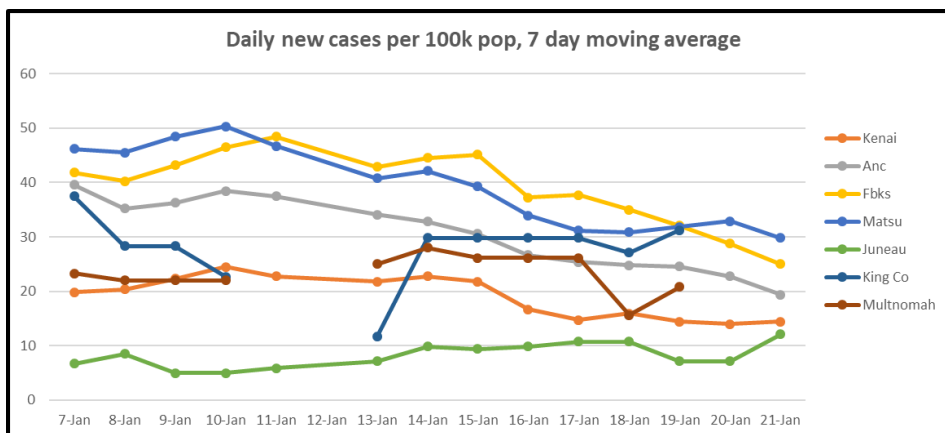

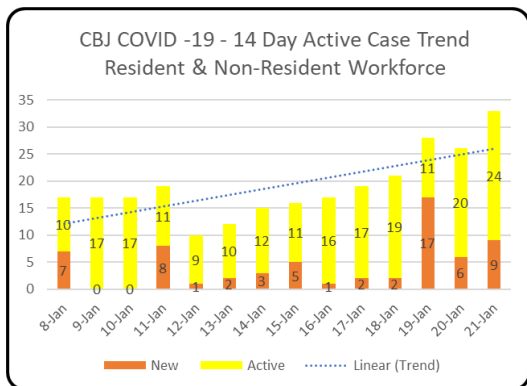

We are reporting 6 new resident cases and 3 new nonresident cases today. For the resident cases, 3 are secondary, 1 is travel, and 2 are under investigation. For the nonresident cases, 1 is travel related and two are old cases that were not previously reported. The old cases are coming on and listed as recovered at the same time.

The State is reporting 167 new cases today bringing the statewide cumulative total to 52,393 cases.

Testing: 1/20/2021: 205 test results were received from the Fulgent Lab with collection dates between 01/17/2021 – 01/19/2021 – 46 tests were returned in 1 day, 126 were returned in 2 days, and 33 were returned in 3 days.

Vaccine counts are updated on Monday, Wednesday & Friday through the State Dashboard.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
