RE: **Situational Update –Level 2 Moderate-** Operational Period 28 (12/31/2020 – 1/28/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
<b>Level 2 - Moderate</b>	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

**The Complete CBJ COVID-19 Dashboard can be found [here](https://juneau.org/covid-19) or by going to [Juneau.org/COVID-19](https://juneau.org/covid-19)**

**Situation Assessment:** Our 14 day and 7 day case rate indicators have elevated to the High level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

**Issues of Note:**

The EOC should hear about the February vaccine allotment sometime mid to late week. We remain ready to standup another vaccination clinic if supplies are sufficient. To date, approximately 18.3% of the community population age 16 and over has received the first dose of COVID vaccine. 4.4% have received their second dose. Planning is beginning for the next potential POD cohort.

**Daily Numbers Report:**

We are reporting 4 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	28	1015	5	1,048
Nonresident	2	133	0	135
<b>Total</b>	<b>30</b>	<b>1,148</b>	<b>5</b>	<b>1,183</b>

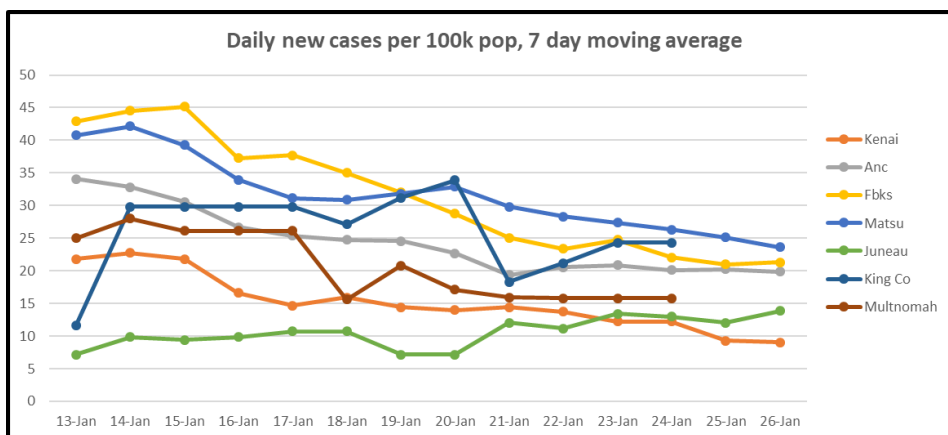

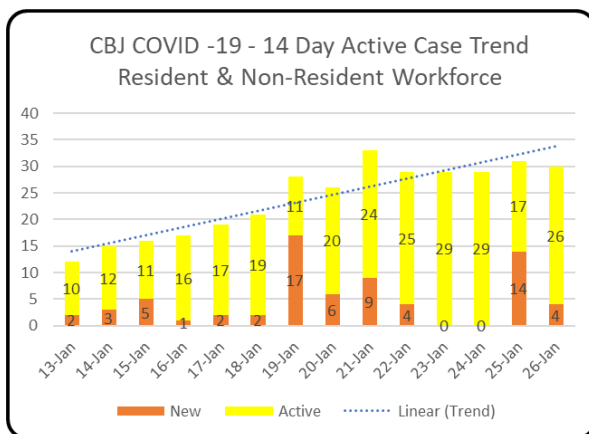

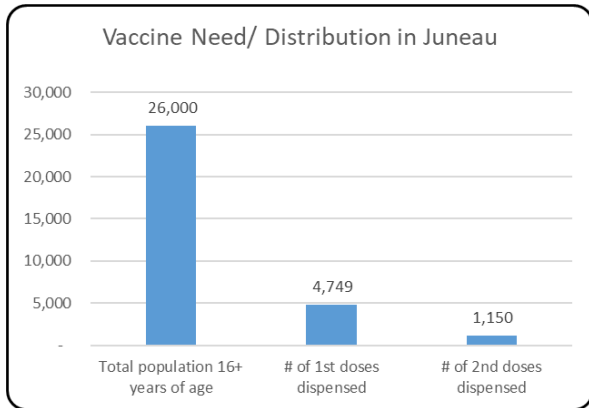

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

**Disease Transmission/Contact Tracing:**

The EOC is reporting 4 new resident cases and no new nonresident cases. 1 case is community spread, 1 case is travel, and 2 are under investigation.

The State is reporting 89 new cases today bringing the statewide cumulative total to 53,487 cases.

**Testing:** 01/25/21: 54 test results were received from the Fulgent Lab with collection dates between 01/22/2021 – 01/24/2021 – 1 test returned in 1 day, 14 tests returned in 2 days, and 39 tests returned in 3 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
