DATE: February 5, 2021
 TO: CBJ Assembly
 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 2 Moderate-** Operational Period 29 (1/28/2021 – 2/25/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](https://juneau.org/covid-19) or by going to [Juneau.org/COVID-19](https://juneau.org/covid-19)

Situation Assessment: Our 14 day and 7 day case rate indicators are in the High Alert level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. A more aggressive strain of COVID-19 has been identified in Alaska. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Reminder: The State of Alaska is no longer updating their dashboard over the weekend or on holidays. As a result, CBJ will not be creating a weekend EOC report.

The Governor's current emergency disaster declaration is set to expire on February 14th at 11:59pm. A bill (SB56) extending the emergency until September 21, 2021, has been filed. Given the current status at the legislature, the earliest anticipated action is the end of February. The state will come up with a bridge plan, but the state is recommending that local governments have standing emergency orders in place to cover the duration.

All individuals tested associated with the RALLY exposure at JSD have returned negative. The Auke Bay classroom exposure and the High School basketball team exposures are pending test results.

Vaccine updates: 20.7% of the Juneau population age 16 and above have been vaccinated with 7.7% of the population having received their 2nd dose.

The second dose clinic for the first POD (POD1b) is scheduled to begin today and run through Sunday afternoon.

Registration for POD 2 is underway. The POD is currently open to healthcare workers and community members 65 years of age and up. We are verifying that all those registered are actually eligible. At present,

there are about 350 appointments available. State data indicates that about 66% of those who are 65 years of age and older in Juneau have been vaccinated – leaving a balance of approximately 1500 individuals in that age grouping yet to be vaccinated. We are following the State’s decisions about when to open the next tier very closely.

Daily Numbers Report:

We are reporting 2 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	34	1,055	5	1,090
Nonresident	2	137	0	139
Total	36	1,188	5	1,229

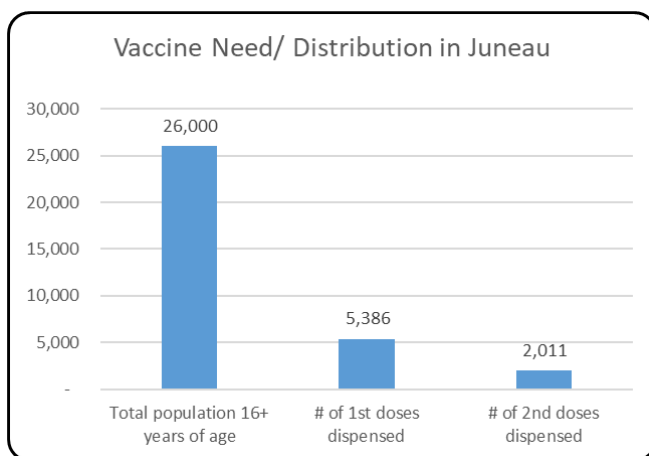

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

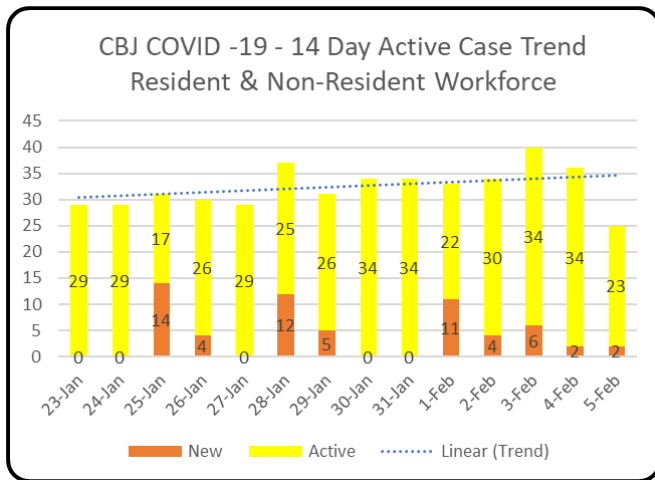

Disease Transmission/Contact Tracing:

We are reporting 2 new resident cases and no new nonresident cases. 1 case is travel related the other case is a resident at Wildflower Court and the case is under investigation. At present, the case is being included in the current Wildflower Court cluster bringing the total positives to 12 with 9 recovered.

The State is reporting 250 new cases today bringing the statewide cumulative total to 55,259 cases.

Testing: 2/04/21: 30 test results were received from the Fulgent Lab with a collection date of 02/02/2021 – all 30 tests returned in 2 days. Please note: We are in the process of determining how to report out airport testing with the conversion of operations to Capstone.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
