FROM: Mila Cosgrove, Incident Commander

RE: **Situational Update –Level 2 Moderate-** Operational Period 29 (1/28/2021 – 2/25/2021)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 2 - Moderate	Overall cases have dropped but community spread based cases continue to occur.	The hospital case load is stable.	Contact tracing is constrained due to difficulty in reaching close contacts.

The Complete CBJ COVID-19 Dashboard can be found [here](https://juneau.org/covid-19) or by going to [Juneau.org/COVID-19](https://juneau.org/covid-19)

Situation Assessment: Our 14 day and 7 day case rate indicators are in the High Alert level. The disease continues to move across all disease acquisition types: community spread, secondary transmission, and travel. A more aggressive strain of COVID-19 has been identified in Alaska. We caution the public to strictly adhere to all health orders related to travel and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Vaccine updates: 22.0% of the Juneau population age 16 and above have been vaccinated with 13.3% of the population having received their 2nd dose.

The second vaccine clinic – POD2(a) will occur on February 11 and 12 this week. The 2nd dose clinic will be March 4 – 5. The POD is currently open to healthcare workers and community members 65 years of age and up. At present, there are about 285 appointments available. We anticipate that the state will open the next Tier of eligibility this week.

Daily Numbers Report:

We are reporting 1 new case today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	18	1,077	5	1,100
Nonresident	0	139	0	139
Total	18	1,216	5	1,239

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 1 new resident case today. It is a secondary transmission case. The Wildflower Court cluster is at 12 positives with 10 recovered. All cases at Wildflower Court are asymptomatic.

The State is reporting 116 new cases today bringing the statewide cumulative total to 55,893 cases.

Testing: Please note: We are in the process of determining how to report out airport testing with the conversion of operations to Capstone.

2/8/21: 20 test results were received from the Fulgent Lab with collection dates between 02/06/2021 – 02/07/2021 – 215 tests returned in 1 day and 15 tests returned in 2 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
