 RE: **Situational Update –Level 1 Minimal-** Operational Period 29 (1/28/2021 – 2/25/2021)

| Overall Community Risk | Disease Situation | Hospital Capacity | Public Health Capacity |
|--------------------------|---|-----------------------------------|----------------------------|
| Level 1 - Minimal | Overall cases have dropped. Some community spread is present. | The hospital case load is stable. | Contact tracing is stable. |

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

Situation Assessment: Our 14 day case rate indicator is at the Moderate alert level and the 7 day rate indicator is at the Minimal alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. The more aggressive strain of COVID-19 has been identified in Alaska. We caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

Community Risk level was downgraded to Level 1 – Minimal today. Our overall case counts are low, there is community spread but it is a small number of cases, and both hospital and public health capacity is good.

Vaccine updates: 27.4% of the Juneau population age 16 and above have been vaccinated with 17.6% of the population having received their 2nd dose. March vaccine allocation will be released tomorrow along with the dates and registration information for the next POD.

The State EOC has provided some updated graphs regarding Airport through put and testing activities. The charts and graphs are at the end of this report.

Daily Numbers Report:

We are reporting 9 new cases today.

| COVID-19 In Juneau | | | | |
|--------------------|-----------|--------------|----------|--------------|
| | Active | Recovered | Deceased | Cumulative |
| Resident | 22 | 1,098 | 5 | 1,125 |
| Nonresident | 0 | 140 | 0 | 140 |
| Total | 22 | 1,238 | 5 | 1,265 |

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 9 new resident cases and no new nonresident cases today. The 9 resident cases are all secondary transmission and all individuals were already quarantining.

The State is reporting 213 new cases today bringing the statewide cumulative total to 57,191 cases.

Testing: Please note: We are in the process of determining how to report out airport testing with the conversion of operations to Capstone.

2/16/21: 22 test results were received from the Fulgent Lab with collection dates between 02/15/2021 – 02/16/2021 – 3 test2 returned in 1 day and 19 tests returned in 2 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website

Airport Information:

| As of 2.17.21 /Juneau | Week 36 2.7-2.13 | Totals (last 12 weeks) |
|---------------------------------|---------------------|---------------------------|
| # travelers screened | 585 | 8,659 |
| # tested prior to travel | 201 | 2,826 |
| # tested in airport | 260 | 4,084 |
| # selected 14-day quarantine | 20 | 282 |
| # positive tests (airport only) | 1 | N/A |
| # vouchers redeemed | N/A | N/A |
