 FROM: Mila Cosgrove, Incident Commander
 RE: **Situational Update –Level 1 Minimal-** Operational Period 30 (2/25/2021 – 3/25/21)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 1 - Minimal	Overall cases have dropped. Some community spread is present.	The hospital case load is stable.	Contact tracing is stable.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

Situation Assessment: Our 14 day case rate indicator is at the moderate alert level and our 7 day case rate indicator is in the high alert level - primarily due to secondary transmission among large family groups. The community continues to see COVID transmit via community spread, secondary infection, and travel. Two aggressive variant strains of COVID-19 have been identified in Alaska. We caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Issues of Note:

29.9% of the Juneau population age 16 and above have been vaccinated with 20.2% of the population having received their 2nd dose. The State is reporting that 78.4% of the population in Juneau age 65+ have received at least the first dose of vaccine.

Registration for POD 3a (Friday March 12, noon to 7pm and Saturday March 13, 9am to 4pm) is open. 746 appointment remain. Registration will remain open until slots are filled. POD 3b (second dose clinic) will be April 2 and 3.

Daily Numbers Report:

We are reporting 1 new cases today.

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	19	1,121	5	1,145
Nonresident	2	140	0	142
Total	21	1,261	5	1,287

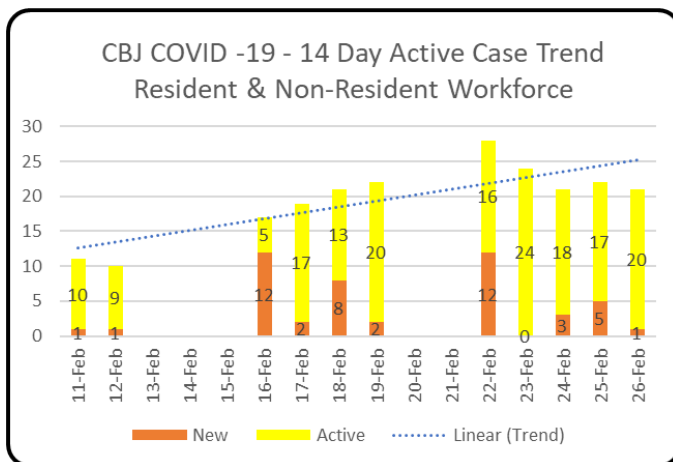

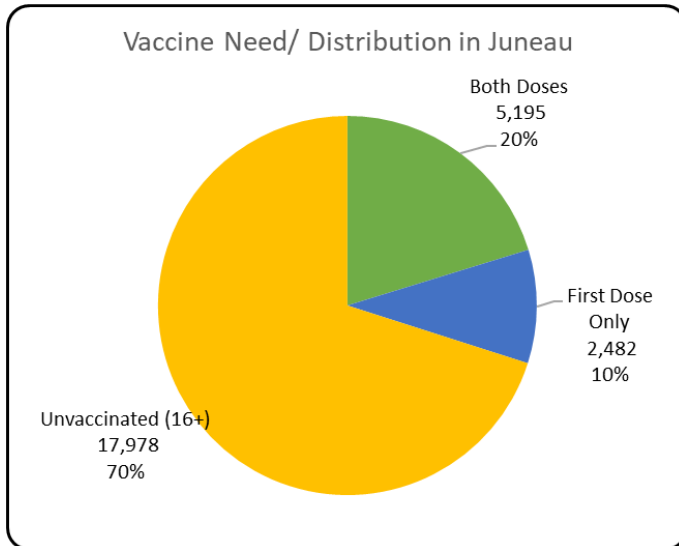

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

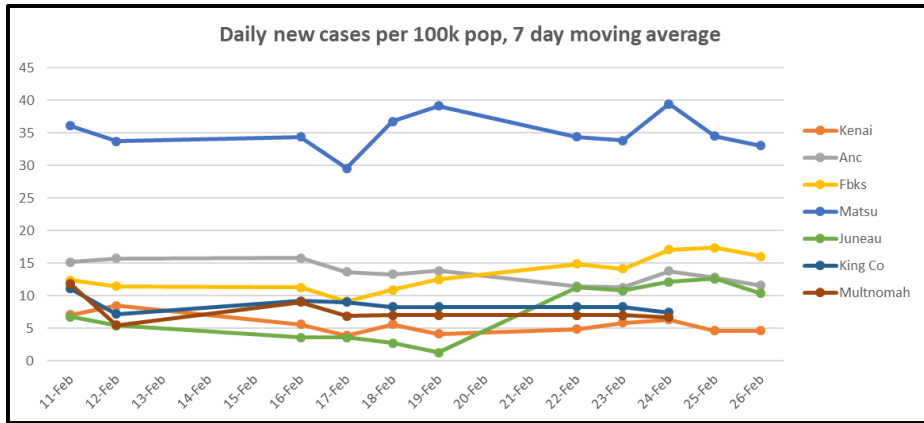

Disease Transmission/Contact Tracing:

We are reporting 1 new resident case and no new nonresident cases today. The new case is secondary transmission.

The State is reporting 112 new cases today bringing the statewide cumulative total to 58,293 cases.

Testing: 2/25/21: 1 test result was received from the Fulgent Lab with a collection date of 02/23/2021 – the test was returned in 2 days.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
