 RE: **Situational Update –Level 1 Minimal-** Operational Period 31 (03/25/21 – 04/22/21)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 1 - Minimal	Overall cases rates are increasing. Community spread is present. Vaccine is available.	The hospital case load is stable.	Contact tracing is stable.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

Situation Assessment: Our 14 day case rates are at the moderate alert level and our 7 day case rates are at the high alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise which offers the community a level of protection. The more aggressive variants of COVID-19 have been identified in Alaska. Case rates are statewide are high but beginning to even out. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

Weekly Summary – 14 day lookback for positive tests collected March 29th –April 11th.

Over the last rolling 14 day period, 40 people tested positive for COVID-19 in the community.

Highlights:

20% of the cases were associated with a cluster involving a small daycare. To date, there have been 8 positive cases associated with that cluster.

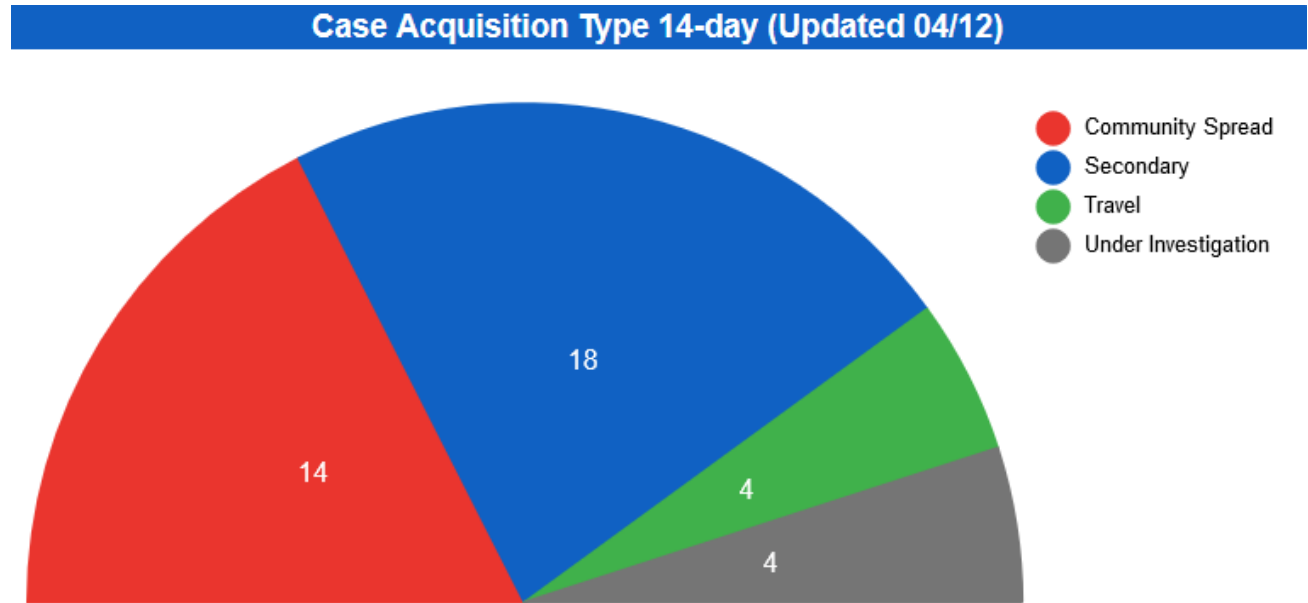

35% of the cases were designated as community spread, 45% of the cases were designated as Secondary Infection, 10% of the cases were associated with Travel, and the remaining 10% of the cases remain under investigation.

Contact tracing is improving with 100% of individuals being contacted within 24 hours of a positive test being returned.

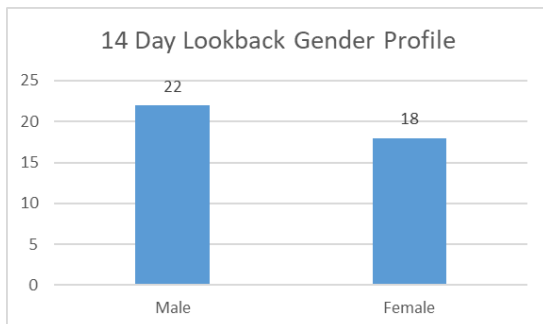

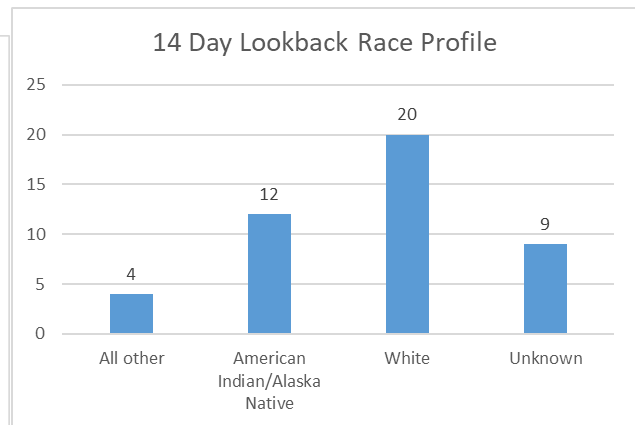

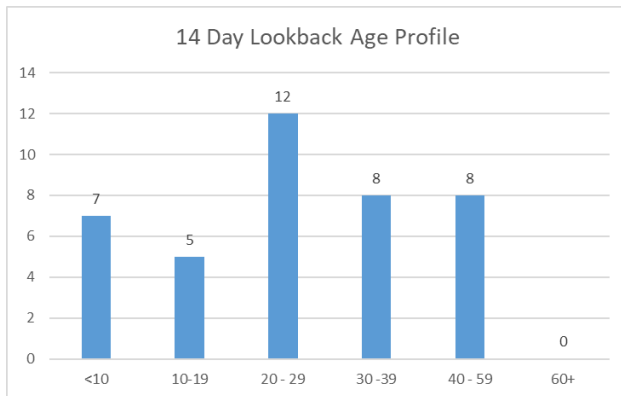

Disease spread is across all age groups, most racial groupings, and is more prevalent in males than females (55%/45%).

Disease Acquisition:

Of the 40 positive cases during the last 14 day period, 14 were identified as community spread, 18 were identified as secondary transmission, 4 were identified as travel related, and 4 remain under investigation.

Demographics:

Issues of Note:

There are 8 active cases connected to a small daycare cluster. Anyone who has been deemed a close contact to these cases has been contacted by Public Health.

A small vaccine clinic was run on Friday at Mendenhall Auto. This business signed up through the “bring a clinic to your organization” program. In all 12 people were vaccinated. Organizations who may be interested in bringing a vaccine clinic to their site can submit a form at Juneau.org/covid-19

NEW: POD 9 will be on Friday April 16th from 1:00 pm to 7:00 pm at St. Brendan’s Episcopal Church. This clinic will use J&J vaccine.

NEW: POD 10 A will be at the UAS Recreation Center and run from April 20 – 24 from 1:00 pm to 7:00 pm. This clinic will use Pfizer. The second dose clinic (10b) will be May 15 – 18.

POD (8) is scheduled for Saturday, April 17th from 10:00 am to 3:00 pm at Centennial Hall. Anyone age 16 and up is eligible to participate. The second dose clinic (8b) will be held on May 8th. Registration is currently open and there are 336 appointments available.

Daily Numbers Report: We are reporting 5 new cases today (Friday 1:00 pm – Monday 1:00 pm).

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	25	1,202	5	1,233
Nonresident	5	148	0	152
Total	30	1,350	5	1,385

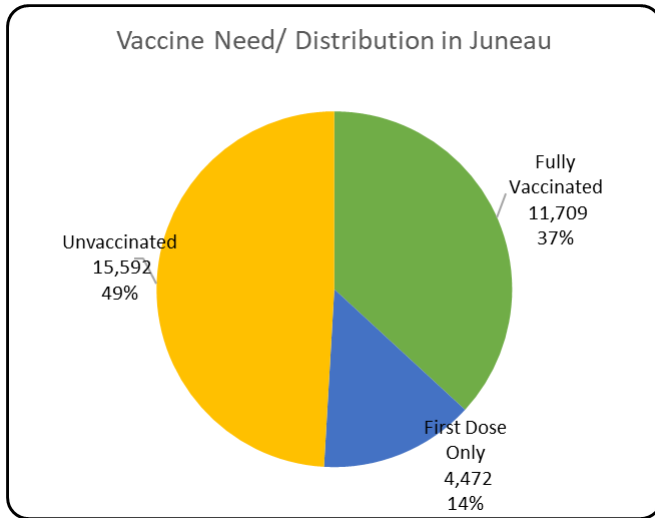

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 5 new resident cases and no new nonresident cases. 1 case is community spread, 3 cases are secondary infection, and 1 case remains under investigation. 2 of the secondary cases are associated with the daycare cluster which now has 8 positive cases with no cases yet recovered.

That State is reporting 83 new cases today bringing the statewide total to 65,180 cases. This is a total of 398 new cases since the last EOC report.

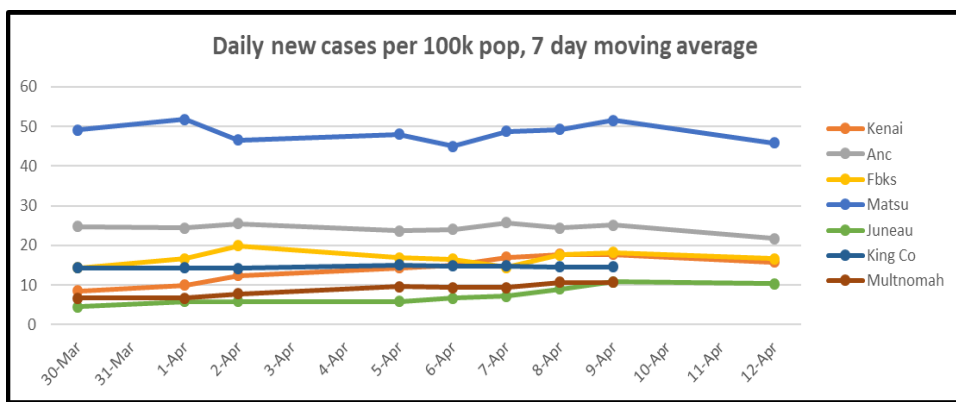

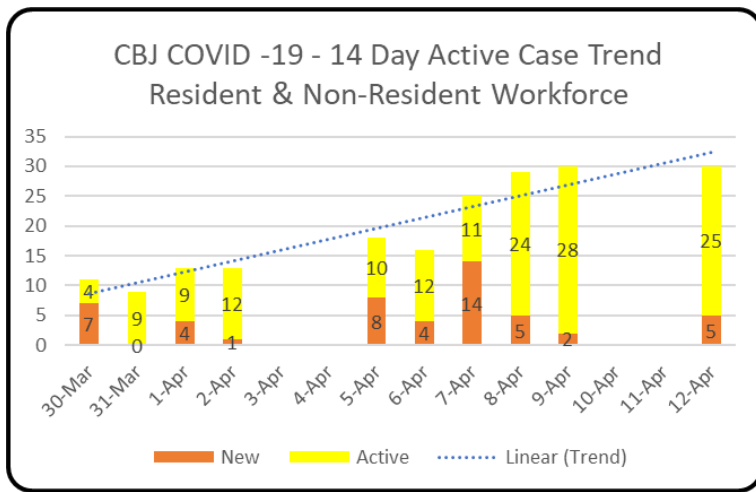

Testing: 306 COVID tests were processed at BRH between April 5 and April 11, all returning in less than 24 hours.

Total: **51.3%** of the of the total population of Juneau has received at least 1 dose of vaccine and **37.8%** are fully vaccinated.

16+: **63.5%** of the age eligible Juneau population has received at least 1 dose of vaccine. **46.8%** is fully vaccinated.

65+: **91.2%** of the population in Juneau age 65+ has at least one dose of vaccine.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
