 RE: **Situational Update –Level 1 Minimal-** Operational Period 32 (04/22/21 – 05/20/21)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
<b>Level 1a - Minimal</b>	The community continues to experience consistent positive case activity and community spread is present. Vaccine is available.	The hospital case load is stable.	Contact tracing is stable.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

**Situation Assessment:** Our 14 day case rate is at the moderate alert level and our 7 day case rate is at the minimal alert level. The community continues to see COVID transmit via community spread, secondary infection, and travel. COVID vaccine distribution is on the rise which offers the community a level of protection. A variant of concern (UK/B1.1.7) has been identified in Juneau. Case rates statewide are high but appear to be evening out. We continue to caution the public to strictly adhere to all travel related rules and to continue strict adherence to masking and social distancing when outside your immediate home.

**If case activity stays at Level 1, the community will move to Level 1b on May 12th.**

**Issues of Note:**

The vaccine planning team met to determine what May vaccine distribution will look like. At this point, the plan is for the Janssen (J&J) to be offered at second dose clinics that are currently scheduled in May. Exact allocation amounts are still under investigation. Once that information is known, dates will be advertised to the public.

In addition, new clinics will be held at the valley location of True North Federal Credit Union, Gruening Park, and the old Household Hazardous Waste facility in Lemon Creek. These new clinics will offer the Pfizer vaccine and Janssen if it is available.

Clinics will also be held through the Juneau School District once vaccines are approved for the 12-15 year old age group. This is still anticipated to occur prior to the end of the school year.

**Daily Numbers Report:** We are reporting 7 new cases today (Wednesday 1:00 pm – Friday 1:00 pm).

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	11	1,265	5	1,281
Nonresident	3	155	0	158
<b>Total</b>	<b>14</b>	<b>1,420</b>	<b>5</b>	<b>1,439</b>

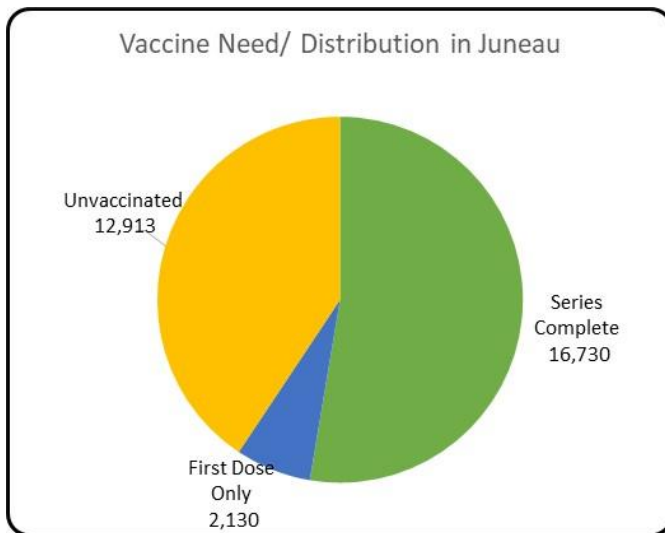

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 5 new resident cases and 2 new nonresident cases. 1 case is secondary infection, 1 case is community spread, 1 case is travel related and the remaining 4 are under investigation. The cluster at TMHS is at 8 with 8 recovered. The cluster is tentatively considered closed.

That State is reporting 138 new cases today bringing the statewide total to 68,148 cases. This is a total of 314 new cases since the last EOC report.

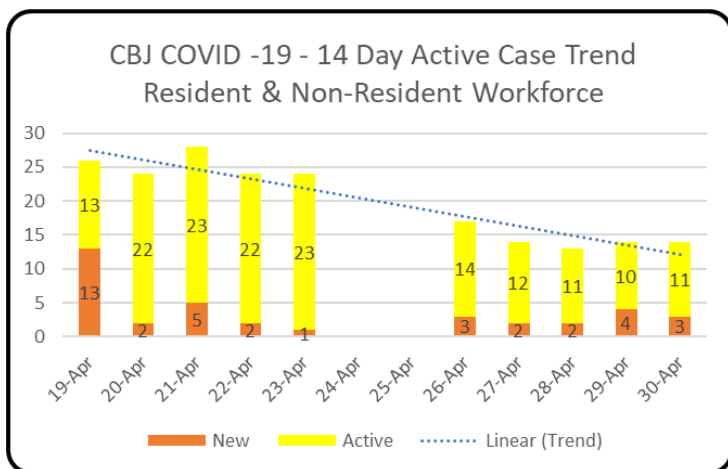

Testing: 280 COVID tests were processed at BRH between over the last two days, all tests returned in less than 24 hours.

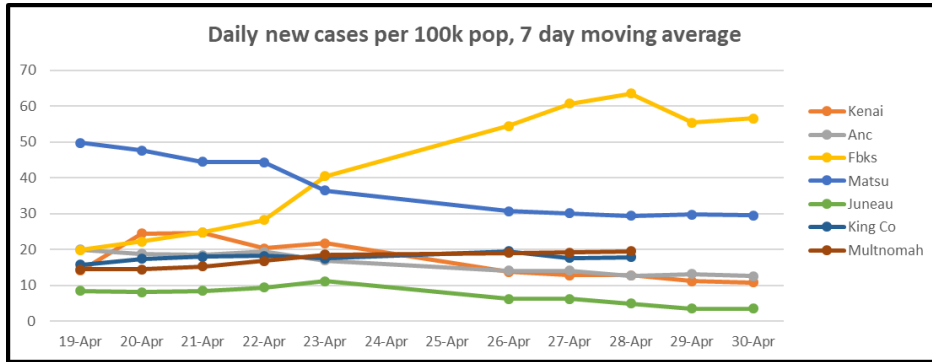

Total: **59.4%** of the of the total population of Juneau has received at least 1 dose of vaccine and **52.7%** have completed their vaccine series.

16+: **73.5%** of the age eligible Juneau population has received at least 1 dose of vaccine. **65.2%** have completed their vaccine series.

65+: **93.6%** of this age group has at least one dose of vaccine. **89.4%** have completed the vaccine series.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
